OMB Control Number: 2900-0208.

Type of Review: Extension of a currently approved collection.

Abstract: The Department of Veterans Affairs, Office of Construction and Facilities Management (CFM), manages a multi-million-dollar construction program that involves the design and construction of medical centers, and other VA facilities including building improvements and conversions. The actual construction work is contracted out to private construction firms. The use of VA Form 6298, Architect-Engineer Fee Proposal is mandatory for

obtaining the proposal and supporting cost or pricing data from the contractor and subcontractor in the negotiation of all architect-engineer contracts for design services when the contract price is estimated to be \$50,000 or more. It is also used in obtaining proposals and supporting cost or pricing data for architect engineer services for research study, seismic study, master planning study, construction management and other related services contracts. VA Form 10101, Contractor Production Report, is used to record the data necessary to ensure the contractor provides sufficient labor and materials to accomplish the contract work. Contractors are required to guarantee the performance of the work necessary to complete the project. VAAR 852.236–79 details what needs to be addressed by the contractor on the Contractor Production Report. Failure to receive information from the Contractor Production Report could result in a claim for non-performance and construction delays against the Government if the Government were unable to collect this information to administer the contract.
