[MB Docket No. 21–130; RM–11897; DA 22–33; FR ID 67663]

Television Broadcasting Services Portland, Oregon

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: On July 16, 2021, the Media Bureau, Video Division (Bureau) issued a *Notice of Proposed Rulemaking (NPRM)* in response to a petition for rulemaking filed by KPTV Broadcasting Corporation (Petitioner), the licensee of KPTV, channel 12, Portland, Oregon, requesting the substitution of channel 21 for channel 12 at Portland in the Table of Allotments. For the reasons set forth in the *Report and Order* referenced below, the Bureau amends FCC regulations to substitute channel 21 for channel 12 at Portland.

DATES: Effective January 25, 2022.

FOR FURTHER INFORMATION CONTACT: Joyce Bernstein, Media Bureau, at (202) 418–1647 or Joyce.Bernstein@fcc.gov.

SUPPLEMENTARY INFORMATION: The proposed rule was published at 86 FR 43470 on August 9, 2021. The Petitioner filed comments in support of the petition reaffirming its commitment to apply for channel 21. Gray Television, Inc., which acquired the station, also filed comments in support of the petition and stating its commitment to apply for channel 21. In support of its channel substitution request, the Petitioner states that the Commission has recognized that VHF channels have certain characteristics that pose challenges for their use in providing digital television service. In addition, the Petitioner has received numerous complaints of poor or no reception from viewers. Finally, the Petitioner demonstrated that the channel 21 noise limited contour would fully encompass the existing channel 12 contour, and an analysis using the Commission's *TVStudy* software indicates that Petitioner's proposal would result in an increase of 39,677 persons predicted to receive KPTV service and 499 persons that would gain a second over the air signal.

This is a synopsis of the Commission's *Report and Order*, MB Docket No. 21–130; RM–11897; DA 22–33, adopted January 12, 2022, and released January 12, 2022. The Commission will send a copy of this Report and Order in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

Fisheries of the Northeastern United States; Southern Red Hake Rebuilding Plan; Framework Adjustment 62 to the Small-Mesh Multispecies Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS approves and implements Framework Adjustment 62 for Whiting, Red Hake, and Offshore Hake to the Northeast Multispecies Fishery Management Plan. This action establishes a 10-year rebuilding plan, including a rebuilding schedule and change in possession limits for the overfished southern red hake stock. This action is necessary to meet the statutory requirements for an overfished stock and rebuilding plan consistent with the Magnuson-Stevens Fishery Conservation and Management Act. This action is intended to rebuild the southern red hake stock and help achieve optimum yield in the commercial fishery.

DATES: Effective January 25, 2022.

ADDRESSES: The New England Fishery Management Council developed an environmental assessment (EA) for this action that describes and analyzes these measures and other considered alternatives. Copies of Framework Adjustment 62, including the EA and information on the economic impacts of this rulemaking, are available upon request from Thomas A. Nies, Executive Director, New England Fishery Management Council, 50 Water Street, Newburyport, MA 01950 and accessible via the internet in documents available at: https://www.nefmc.org/library/framework-62.

Copies of the small entity compliance guide are available from Michael Pentony, Regional Administrator, NMFS, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930–2298, or available on the internet at: http://www.greateratlantic.fisheries.noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

In January 2018, the southern red hake stock was declared overfished. To meet the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) requirements of an overfished stock, a rebuilding plan and associated management measures are necessary to prevent overfishing, ensure adequate rebuilding, and help achieve optimum yield in the fishery. The New England Fishery Management Council took final action on Framework Adjustment 62 (Framework 62) to the Northeast Multispecies Fishery Management Plan at its June 2020 meeting and submitted the action to us in mid-August 2020. NMFS published a proposed rule on July 12, 2021 (86 FR 36519), with a comment period ending on July 27, 2021.

NMFS has approved all of the measures in Framework 62 recommended by the Council, as described below. This final rule establishes a 10-year rebuilding plan, including a rebuilding schedule and change in possession limits for the overfished southern red hake stock. The Magnuson-Stevens Act allows NMFS to approve, partially approve, or disapprove measures proposed by the Council based on whether the measures are consistent with the FMP, the Magnuson-Stevens Act and its National Standards, and other applicable law. Details concerning the development of these measures were contained in the preamble of the proposed rule and are not repeated here.

Southern Red Hake Rebuilding Schedule

This action establishes a 10-year rebuilding schedule for southern red hake. Under this rebuilding program, catch limits will be established by reducing the acceptable biological catch (ABC) to 75 percent of the fishing mortality rate at maximum sustainable yield (FMSY) for the duration of the rebuilding period, or until the stock reaches its biomass target, whichever happens first. In past years, the ABC has been set at 90 percent or higher of the FMSY, consistent with the Council’s Scientific and Statistical Committee recommendations.

Changes to Southern Red Hake Possession Limits

This action will also decrease the trip possession limit from 5,000 lb (2,268 kg) to a dual 1,000-lb/600-lb (453.6-kg/272.2-kg) possession limit based on the selectivity of the gear type or mesh size being used (Table 1). The 600-lb (272.2-kg) possession limit will apply to
