

Labor administers the Fair Labor Standards Act (FLSA), 29 U.S.C. 201, *et seq.* The child labor provisions of the FLSA establish a minimum age of 16 years for employment in nonagricultural occupations, but the Secretary of Labor is authorized to provide by regulation for 14- and 15-year-olds to work in suitable occupations other than manufacturing or mining, and during periods and under conditions that will not interfere with their schooling or health and well-being. 29 CFR 570.35(b) describes the conditions of employment that allow the employment of 14- and 15-year-olds, pursuant to a school-supervised and school-administered Work-Study Program (WSP), under conditions Child Labor Regulation 3 otherwise prohibit. The regulation requires the implementation of an information collection with regard to a WSP. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 28, 2021 (86 FR 53690).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–WHD.

Title of Collection: Work-Study Program of the Child Labor Regulations.

OMB Control Number: 1235–0024.

Affected Public: State, Local, and Tribal Governments; Private Sector—Businesses or other for-profits and not-for-profit institutions.

Total Estimated Number of Respondents: 510.

Total Estimated Number of Responses: 1,010.

Total Estimated Annual Time Burden: 528 hours.

Total Estimated Annual Other Costs Burden: \$0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Dated: January 26, 2022.

Mara Blumenthal,

Senior PRA Analyst.

BILLING CODE 4510–FN–P

NATIONAL SCIENCE FOUNDATION

Notice of Intent To Seek Approval To Establish an Information Collection System

AGENCY: National Science Foundation.

ACTION: Notice and request for comments.

SUMMARY: Under the Paperwork Reduction Act of 1995, and as part of its continuing effort to reduce paperwork and respondent burden, the National Science Foundation (NSF) is inviting the general public or other Federal agencies to comment on this proposed continuing information collection.

DATES: Written comments on this notice must be received by April 4, 2022, to be assured consideration. Comments received after that date will be considered to the extent practicable. Send comments to address below.

FOR FURTHER INFORMATION CONTACT:

Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Suite W18200, Alexandria, Virginia 22314; telephone (703) 292–7556; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Foundation, including whether the information will have practical utility; (b) the accuracy of the Foundation's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

SUPPLEMENTARY INFORMATION:

Title of Collection: Program Monitoring Data Collections for National Science Foundation (NSF) Small Business Innovation Research (SBIR)/Small Business Technology Transfer (STTR) Programs.

OMB Number: 3145–NEW.

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to establish an information collection for post-award output and outcome monitoring system.

Abstract: The NSF SBIR/STTR programs focus on transforming scientific discovery into products and services with commercial potential and/or societal benefit. Unlike fundamental or basic research activities that focus on scientific and engineering discovery itself, the NSF SBIR/STTR programs support the creation of opportunities to move fundamental science and engineering out of the lab and into the market at scale, through startups and small businesses representing deep technology ventures. Here, deep technologies refer to technologies based on discoveries in fundamental science and engineering. The NSF SBIR/STTR programs are designed to provide non-dilutive funding (financing that does not involve equity, debt, or other elements of the business ownership structure) at the earliest stages of technology research and development.

The NSF SBIR/STTR programs are Congressionally mandated. By investing federal research and development funds into startups and small businesses, NSF hopes to stimulate the creation of novel products, services, and solutions in the private sector, strengthen the role of small business in meeting federal research and development needs, increase the commercial application of federally supported research results, build a strong national economy, and increase and develop the U.S. workforce, especially by fostering and encouraging participation of socially and economically disadvantaged and women-owned small businesses.

Both the NSF SBIR and NSF STTR programs have two phases: Phase I and Phase II. Phase I is a 6–12 month experimental or theoretical investigation that allows the awardees to determine the scientific, technical, and commercial merit of the idea or concept. Phase II further develops the proposed concept, building on the feasibility of the project undertaken in Phase I, with a goal of working toward the commercial launch of the new product, process, or service being developed.

The NSF SBIR/STTR programs request the Office of Management and Budget (OMB) approval of this clearance that will allow the programs to improve the rigor of our surveys for evaluations and program monitoring, as well as to initiate new data collections to monitor the immediate, intermediate, and long-term outcomes of our investments by

periodically surveying the startup businesses and their founders/co-founders involved in the businesses. The clearance will allow the SBIR/STTR programs to rigorously develop, test, and implement survey instruments and methodologies.

The primary objective of this clearance is to allow the NSF SBIR/STTR programs to collect characteristics, output, and outcome information from the startup companies funded by the programs. This collection will enable the evaluation of the impacts of our investments in technology translation and innovation over time. The second, related objective is to improve our questionnaires and/or data collection procedures through pilot tests and other survey methods used in these activities. Under this clearance a variety of surveys could be pre-tested, modified, and used.

Following standard OMB requirements, NSF will submit to OMB an individual request for each survey project we undertake under this clearance. NSF will request OMB approval in advance and provide OMB with a copy of the questionnaire and materials describing the project.

Data collected will be used for planning, management, evaluation, and

audit purposes. Summaries of output and outcome monitoring data are used to respond to queries from Congress, the Small Business Administration (SBA), the public, NSF’s external merit reviewers who serve as advisors, including Committees of Visitors (COVs), NSF’s Office of the Inspector General, and other pertinent stakeholders. These data are needed for effective administration, program monitoring, evaluation, outreach/marketing roadmaps, and for strategic reviews and measuring attainment of NSF’s program and strategic goals, as identified by the President’s Accountable Government Initiative, the Government Performance and Results Act Modernization Act of 2010, Evidence-Based Policymaking Act of 2018, and NSF’s Strategic Plan.

All questions asked in the data collection are questions that are NOT included in the annual, final or outcomes reports, and the intention is to ask the grantees even beyond the period of performance on voluntary basis in order to capture impacts of the research that occur during and beyond the life of the award.

Grantees will be invited to submit information on a periodic basis to

support the management of the NSF SBIR/STTR investment portfolio. Once the survey tool for a specific program is tested, grantees will be invited to submit these indicators to NSF via data collection methods that include, but are not limited to, online surveys, interviews, focus groups, phone interviews, etc. These indicators are both quantitative and descriptive and may include, for example, the characteristics of project personnel, sources of funding and support, knowledge transfer and technology translation activities, patents, licenses, publications, descriptions of significant advances, and other outcomes of the funded efforts.

Use of the Information

The data collected will be used for NSF internal and external reports, historical data, program level studies and evaluations, and for securing future funding for the maintenance and growth of the NSF SBIR/STTR programs. Evaluation designs could make use of metadata associated with the award and other characteristics to identify a comparison group to evaluate the impact of the program funding and other interesting research questions.

ESTIMATE OF PUBLIC BURDEN

Collection title	Number of respondents	Annual number of responses/respondent	Annual hour burden
Program Monitoring Data Collections for National Science Foundation (NSF) Small Business Innovation Research, (SBIR)/Small Business Technology Transfer (STTR) Programs.	400 startup businesses per year	3	600

For life-of-award monitoring, the data collection burden to awardees will be limited to no more than 30 minutes of the respondents’ time in each instance.

Respondents

The respondents are either Principal Investigators (PIs) of the startup businesses that the NSF SBIR/STTR Programs awarded, founders, co-founders, and/or key personnel of the startup businesses. In the case of Business Survey, only one response

from each startup/small business is anticipated.

Estimates of Annualized Cost to Respondents for the Hour Burdens

The overall annualized cost to the respondents is estimated to be \$26,400. The following table shows the annualized estimate of costs to PI/Founders/Business Partners respondents, who are generally university assistant professors. This estimated hourly rate is based on a

report from the American Association of University Professors, “Annual Report on the Economic Status of the Profession, 2020–21,” *Academe*, March–April 2021, Survey Report Table 1. According to this report, the average salary of an assistant professor across all types of doctoral-granting institutions (public, private-independent, religiously affiliated) was \$91,408. When divided by the number of standard annual work hours (2,080), this calculates to approximately \$44 per hour.

Respondent type	Number of respondents	Burden hours per respondent	Average hourly rate	Estimated annual cost
PIs/Founders, Business Partners	400	1.5	\$44	\$26,400
Total	400	26,400

Estimated Number of Responses per Report

Data collection for the collections involves all awardees in the programs involved.

Dated: January 27, 2022.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2021-0149]

Information Collection: Operators' Licenses

AGENCY: Nuclear Regulatory Commission.

ACTION: Renewal of existing information collection; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment on the renewal of Office of Management and Budget (OMB) approval for an existing collection of information. The information collection is entitled, "Operators' Licenses."

DATES: Submit comments by April 4, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2021-0149. Address questions about Docket IDs in [Regulations.gov](https://www.regulations.gov) to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* David Cullison, Office of the Chief Information Officer, Mail Stop: T-6 A10M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

For additional direction on obtaining information and submitting comments, see "Obtaining Information and Submitting Comments" in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: David Cullison, Office of the Chief Information Officer, U.S. Nuclear

Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2084; email: Infocollects.Resource@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC-2021-0149 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2021-0149.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to PDR.Resource@nrc.gov. A copy of the online collections of information and related instructions may be obtained without charge by accessing ADAMS Accession Numbers ML21222A098 and ML21222A099. The supporting document is available in ADAMS under ML21221A100.

- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.

- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2084; email: Infocollects.Resource@nrc.gov.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2021-0149 in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* Part 55 of title 10 of the *Code of Federal Regulations* (10 CFR), "Operators' Licenses."

2. *OMB approval number:* 3150-0018.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* As necessary for the NRC to meet its responsibilities to determine the eligibility for applicants and operators.

6. *Who will be required or asked to respond:* Holders of, and applicants for, facility (*i.e.*, nuclear power and non-power research and test reactor) operating licenses and individual operator licensees.

7. *The estimated number of annual responses:* 437 (345 reporting responses + 92 recordkeepers).

8. *The estimated number of annual respondents:* 92.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 170,928 hours (149,619 hours reporting + 21,309 hours recordkeeping).

10. *Abstract:* 10 CFR part 55 "Operators' Licenses," specifies information and data to be provided by applicants and facility licensees so that the NRC may make determinations concerning the licensing and requalification of operators for nuclear
