

for transplant but prior to anastomosis of the first organ. The committee voted unanimously in favor of the change.

Potential revision to the 2020 Guideline: HHS has reviewed the ACBTSA recommendations and other available information and is considering the following revision to current recommendations in the 2020 Guideline.

Exempt solid organ transplant candidates who are ≤10 years of age at the time of transplant (and who have received postnatal infectious disease testing) from the recommendation for HIV, hepatitis B virus, and hepatitis C virus testing during the hospital admission for transplant but prior to anastomosis of the first organ.

HHS is not considering changes to any other 2020 Guideline recommendations. We seek informed feedback regarding this proposed change to the recommendations in the 2020 Guideline.

Dated: January 25, 2022.

James J. Berger,

Designated Federal Officer, Advisory Committee on Blood and Tissue Safety and Availability, Office of Infectious Disease and HIV/AIDS Policy.
