History and Description of the Remains

In 1938, human remains representing, at minimum, four individuals were removed from the Redwine 1 site (34Lf71) in Le Flore County, OK. Some of the human remains were transferred to the Museum in the 1950s. In 2006, additional human remains were donated to the Museum by a descendant of one of the original excavators. The fragmentary human remains belong to one adult, 20-25 years old; two adults, 20-35 years old; and one adult more

than 20 years old. All the individuals are of indeterminate sex. No known individuals were identified. The 75 associated funerary objects are 46 blue glass beads, 10 red glass beads, six white glass beads, four smoky glass beads, four red and white glass beads, three clear glass beads, and two copper earrings.

The Redwine 1 site has been dated to ca. A.D. 1838, based on the presence of diagnostic historic artifacts. Although this site is located within lands reserved for the Choctaw Nation of Oklahoma, it was also inhabited by Cherokee groups. A review of the archeological, geographical, and historical evidence, as well as the information obtained via tribal consultation, has led the Museum to conclude that these individuals are most likely culturally affiliated with the Cherokee Nation, The Choctaw Nation of Oklahoma, and the United Keetoowah Band of Cherokee Indians of Oklahoma.
