

spillway improvement project. The Service prepared a draft low-effect screening form and environmental action statement in accordance with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) to evaluate the potential effects to the natural and human environment resulting from issuing an ITP to the applicant. We invite public comment on these documents.

Background

The Service listed the arroyo toad as endangered on December 16, 1994 (59 FR 64859), and published a revised final rule designating critical habitat on February 7, 2001 (66 FR 9414). The Service listed the southwestern willow flycatcher as endangered on February 27, 1995 (60 FR 10695), and published a revised final rule designating critical habitat on January 3, 2013 (78 FR 344534). The Service listed the least Bell's vireo as endangered on May 2, 1986 (51 FR 16474), and published a final rule designating critical habitat on February 2, 1994 (59 FR 4845). The Service listed the Santa Ana sucker as threatened on April 12, 2000 (65 FR 19686), and published a revised final rule designating critical habitat on December 14, 2010 (75 FR 77962). The Service listed the yellow-billed cuckoo as threatened on October 3, 2014 (79 FR 59992), and published a final rule designating critical habitat on April 21, 2021 (86 FR 20798).

Section 9 of the ESA prohibits take of fish and wildlife species listed as endangered (16 U.S.C. 1538). Under the ESA, "take" is defined to include the following activities: "to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct" (16 U.S.C. 1532). Section 4(d) of the ESA allows the Secretary to extend protections for endangered species to those listed as threatened. Under section 10(a)(1)(B) of the ESA (16 U.S.C. 1539(a)(1)(B)), we may issue permits to authorize take of listed fish and wildlife species that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing incidental take permits for endangered and threatened species are in the Code of Federal Regulations (CFR) at 50 CFR 17.22 and 17.32. Issuance of an ITP also must not be likely to jeopardize the continued existence of federally listed fish, wildlife, or plant species, pursuant to section 7 of the ESA and 50 CFR part 402. The permittee would receive assurances under our "No Surprises" regulations (50 CFR 17.22(b)(5) and 17.32(b)(5)).

Project

Big Tujunga Dam is a 244-foot high dam located on Big Tujunga River in the Angeles National Forest, Los Angeles County, California. The applicant requests a 30-year incidental take permit for operation and maintenance of Big Tujunga Dam, which regulates stream flows in the Big Tujunga River from Big Tujunga Dam downstream to Hansen Dam, a distance of approximately 14 miles. The incidental take permit would also address a spillway improvement project at Big Tujunga Dam.

The applicant proposes to mitigate or minimize impacts through ramping of water conservation releases during the spawning season of fish, providing up to 1,500 acre-feet of water in supplemental flows during the dry season, monitoring and adaptive management to benefit covered species, funding of nonnative species removal or other recovery measures, and best management practices. The proposed plan also allows for the potential translocation of Santa Ana sucker upstream of Big Tujunga Dam to expand the range of this species.

Our Preliminary Determination

The Service has made a preliminary determination that issuance of the ITP and implementation of the project is not a major Federal action that will significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*). Moreover, issuance of the ITP and implementation of the project individually and cumulatively will not have more than a minor or negligible effect on federally listed or covered species and the environment. Therefore, we have preliminarily concluded that the ITP for this project would qualify for categorical exclusion as provided by our NEPA regulations at 43 CFR 46.205 and 46.215.

Next Steps

We will evaluate the proposed HCP and any comments received to determine whether to issue the requested permit. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of our proposed action. After considering the above findings, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If the criteria are met, we will issue the permit to the applicant for incidental take.
