

OMB Control Number: 0579–0327.

Summary of Collection: The Animal Health Protection Act of 2002 (7 U.S.C. 8301–8317) is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The Veterinary Services unit (VS) of the Animal and Plant Health Inspection Service (APHIS) uses disease control to safeguard U.S. animal health. One important part of disease control is animal disease traceability. Animal disease traceability means being able to document the movement history of an animal throughout its life. Knowing where diseased and at-risk animals have been and are located, as well as when they have been there, is indispensable during an emergency response and important for ongoing disease programs. Traceability helps document the movement history of an animal throughout its life, including during an emergency response or for ongoing animal disease programs.

Need and Use of the Information: APHIS uses the following information collection activities and forms to facilitate Animal Disease Traceability (ADT) and support disease control, eradication, and surveillance activities. Within the ADT framework, official animal identification devices give a nationally unique identification number for livestock animals that require official identification. The distribution and use of official identification devices require some information collection activities. If this information was not collected, APHIS' ability to address traceability needs would be significantly hampered.

Description of Respondents: State, Local, or Tribal Government; Businesses.

Number of Respondents: 273,587.

Frequency of Responses:

Recordkeeping; Reporting: On occasion.

Total Burden Hours: 1,518,339.

Ruth Brown,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request; Reinstatement of a Previously Approved Information Collection

The Department of Agriculture will submit the following information collection requirement(s) to OMB for review and clearance under the

Paperwork Reduction Act of 1995, Public Law 104–13 on or after the date of publication of this notice. Comments are requested regarding: Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments regarding these information collections are best assured of having their full effect if received by March 25, 2022. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Agricultural Marketing Service

Title: Regulations Governing the Inspection and Grading of Manufactured or Processed Dairy Products—Recordkeeping (Subpart B).

OMB Control Number: 0581–0110.

Summary of Collection: The Agricultural Marketing Act of 1946 (7 U.S.C. 1621 *et seq.*) directs the Department to develop programs that will provide for and facilitate the marketing of agricultural products. One of these programs is the USDA voluntary inspection and grading program for dairy products (7 CFR part 58) where dairy products are graded according to U.S. grade standards by a USDA grader. Dairy processors, buyers, retailers, institutional users, and consumers have requested that such a program be developed to assure the uniform quality of dairy products

purchased. In order for any service program to perform satisfactorily, there must be written guides and rules, which in this case are regulations for the provider and user. For the above reasons, these regulations were developed and issued under the authority of the Act. These regulations are essential to administer the program needed by the user and to carry out the purposes of the Act.

Need and use of the Information: The Agricultural Marketing Service will collect information to ensure that the dairy inspection program products are produced under sanitary conditions and buyers are purchasing a quality product. The information collected through recordkeeping are routinely reviewed and evaluated during the inspection of the dairy plant facilities for USDA approval. Without laboratory testing results required by recordkeeping, the inspectors would not be able to evaluate the quality of dairy products.

Description of Respondents: Business or other for-profits.

Number of Respondents: 362.

Frequency of responses:

Recordkeeping; Annually.

Total Burden Hours: 962.

February 17, 2022.

Levi S. Harrell,

Departmental Information Collection Clearance Officer.
