### SUPPLEMENTARY INFORMATION:

#### Background

The Biden Administration established government-wide sustainability goals in the 2021 Executive Order on Catalyzing Clean Energy Industries and Jobs Through Federal Sustainability (E.O. 14057, located at <https://www.whitehouse.gov/briefing-room/presidential-actions/2021/12/08/executive-order-on-catalyzing-clean-energy-industries-and-jobs-through-federal-sustainability/>) and its accompanying Federal Sustainability Plan (located at <https://www.sustainability.gov/federal-sustainabilityplan/index.html>).

The E.O. communicates five government-wide goals for tackling the climate crisis:

- 100 percent carbon pollution-free electricity by 2030
- 100 percent zero-emission vehicle acquisitions by 2035
- Net-zero emissions from federal procurement no later than 2050
- A net-zero emissions building portfolio by 2045
- Net-zero emissions from overall federal operations by 2050

As the current Data Center Optimization Initiative (DCOI) policy (M-21-05, available here: <https://www.whitehouse.gov/wp-content/uploads/2020/11/M-21-05.pdf>) is set to sunset at the end of Fiscal Year 2022, GSA is interested in obtaining information about sustainability best practices for IT infrastructure that could help inform the development of new DCOI metrics.

#### Format

The Data Center and Cloud Sustainability and Resiliency Summit convenes leaders from the federal government and industry for an educational forum to discuss how adoption of modern IT solutions is critical to the country's transition to clean, zero-emissions technologies. Additionally, this summit seeks to explore these solutions' additional economic and national security benefits. If you have questions for the panelists about their sustainability initiatives and technologies, submit them via email to [dccoi@gsa.gov](mailto:dccoi@gsa.gov) by COB March 25th, 2022.
