

screening and reporting, establish independent testing for compliance, designate a bank employee or employees as responsible for OFAC compliance, and create a training program for appropriate personnel in all relevant areas of the institution.

6. Provision of an account and services to an institution should not adversely affect the Federal Reserve's ability to implement monetary policy.

a. The Reserve Bank should incorporate, to the extent possible, the assessments of an institution by state and/or federal supervisors into its independent assessment of the institution's risk profile.

b. The Reserve Bank should determine, in coordination with the other Reserve Banks and the Board, whether access to an account and services by an institution itself or a group of like institutions could have an effect on the implementation of monetary policy.

c. The Reserve Bank should consider, among other things, whether access to a Reserve Bank account and services by the institution could affect the level and variability of the demand for and supply of reserves, the level and volatility of key policy interest rates, the structure of key short-term funding markets, and on the overall size of the consolidated balance sheet of the Reserve Banks. The Reserve Bank should consider the implications of providing an account to the institution in normal times as well as in times of stress. This consideration should occur regardless of the current monetary policy implementation framework in place.

#### Section 2: Tiered Review Framework

The tiered review framework in this section is meant to serve as a guide to the level of due diligence and scrutiny to be applied by Reserve Banks to different types of institutions. Although institutions in a higher tier will face greater due diligence and scrutiny than institutions in a lower tier, a Reserve Bank has the authority to grant or deny an access request by an institution in any of the three proposed tiers, based on the Reserve Bank's application of the Guidelines in Section 1 to that particular institution.

1. *Tier 1*: Eligible institutions that are federally insured.

a. As federally-insured depository institutions, Tier 1 institutions are already subject to a standard, strict, and comprehensive set of federal banking regulations.

b. In addition, for most Tier 1 institutions, detailed regulatory and financial information would in most

cases be readily available, often in public form.

c. Accordingly, access requests by Tier 1 institutions will generally be subject to a less intensive and more streamlined review.

d. In cases where the application of the Guidelines to Tier 1 institutions identifies potentially higher risk profiles, the institutions will receive additional attention.

2. *Tier 2*: Eligible institutions that are not federally insured, but that are subject to federal prudential supervision at the institution and, if applicable, at the holding company level.

a. Although not federally insured, Tier 2 institutions are subject to prudential supervision at the institution level by a federal banking agency (by statute). In addition, any holding company of a Tier 2 institution would be subject to Federal Reserve oversight (by statute or by commitments).

b. Tier 2 institutions are subject to a similar, but not identical, set of regulations as federally-insured institutions. As a result, Tier 2 institutions may still present greater risks than Tier 1 institutions.

c. In addition, detailed regulatory and financial information regarding such institutions may be less available or may not be available in public form.

d. Accordingly, account access requests by Tier 2 institutions will generally receive an intermediate level of review.

3. *Tier 3*: Eligible institutions that are not federally insured and that are not subject to federal prudential supervision at the institution and holding company level.

a. Tier 3 institutions may be subject to a supervisory or regulatory framework that is substantially different from, and less rigorous than, the supervisory and regulatory framework that applies to federally-insured institutions.

b. In addition, detailed regulatory and financial information regarding Tier 3 institutions may not exist or may be unavailable.

c. Accordingly, Tier 3 institutions will generally receive the strictest level of review.

By order of the Board of Governors of the Federal Reserve System.

**SUPPLEMENTARY INFORMATION:** The single-source award will implement a capacity building and government engagement initiative that progressively increases the managerial, technical, and financial investments of the Government of Nigeria (GON) in the HIV response at national and sub-national levels.

NASCP is a division of the Department of Public Health within the FMOH. NASCP is in a unique position to conduct this work, as it is the lead GON organization in Nigeria for leading and coordinating the national HIV/AIDS health sector response. Given its role as the lead GON organization for developing HIV/AIDS policy and program implementation across all states in Nigeria, NASCP is the sole authority qualified to perform essential programmatic activities and to implement a capacity building and

government engagement initiative that progressively increases the managerial, technical, and financial investments of GON in the HIV response to foster sustainability at national and sub-national levels.

#### Summary of the Award

*Recipient:* National AIDS and STDs Control Program (NASCP) within the Federal Ministry of Health (FMOH).

*Purpose of the Award:* The purpose of this award is to strengthen Nigeria's human and institutional capacity at national and sub-national levels for the sustainability of the national HIV program. The execution of this system strengthening agenda will be implemented in partnership with Nigeria's NASCP within the FMOH. The award will involve substantial engagement with CDC-supported states with the objective of establishing HIV/AIDS programmatic sustainability including the achievement and maintenance of HIV/AIDS epidemic control at national and sub-national levels and across all sub-populations.

*Amount of Award:* The approximate year 1 funding amount will be \$3,000,000 in Federal Fiscal Year (FFY) 2022 funds, subject to the availability of funds. Funding amounts for years 2–5 will be set at continuation.

*Authority:* This program is authorized under Public Law 108–25 (the United States Leadership Against HIV AIDS, Tuberculosis and Malaria Act of 2003).

*Period of Performance:* September 30, 2022 through September 29, 2027.

Dated: March 2, 2022.
