SUPPLEMENTARY INFORMATION:

Proposed Project

Online Application Order Form for Products From the Healthcare Cost and Utilization Project (HCUP)

The Healthcare Cost and Utilization Project (HCUP, pronounced “H-Cup”) is a vital resource helping the Agency achieve its research agenda, thereby furthering its goal of improving the delivery of health care in the United States. HCUP is a family of health care databases and related software tools and products developed through a Federal-State-Industry partnership and sponsored by AHRQ. HCUP includes the largest collection of longitudinal hospital care data in the United States, with all-payer, encounter-level information beginning in 1988. The HCUP databases are annual files that contain anonymous information from hospital discharge records for inpatient care and certain components of outpatient care, such as emergency care and ambulatory surgeries. The project currently releases eight types of databases created for research use on a broad range of health issues, including cost and quality of health services, medical practice patterns, access to health care programs, and outcomes of treatments at the national, State, and local market levels. HCUP also produces a large number of software tools to enhance the use of administrative health care data for research and public health use. Software tools use information available from a variety of sources to create new data elements, often through sophisticated algorithms, for use with the HCUP databases.

HCUP’s objectives are to:

- Create and enhance a powerful source of national, state, and all-payer health care data.
- Produce a broad set of software tools and products to facilitate the use of HCUP and other administrative data.
- Enrich a collaborative partnership with statewide data organizations (that voluntarily participate in the project)

aimed at increasing the quality and use of health care data.

- Conduct and translate research to inform decision making and improve health care delivery.

This project is being conducted by AHRQ through its primary contractor and subcontractor, IBM Watson Health and Pantheon Software, pursuant to AHRQ’s statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the outcomes, cost, cost-effectiveness, and use of health care services and access to such services. 42 U.S.C. 299a(a)(3).

Method of Collection

The project currently creates eight types of restricted access public release databases and related files that are released to authorized users under the terms of the HCUP Data Use Agreement (DUA). These HCUP databases and files are used by researchers for a broad range of health issues, including cost and quality of health services, medical practice patterns, access to health care programs, and outcomes of treatments at the national, State, and local market levels.

HCUP achieves the restricted access public release and tracking of the HCUP databases through the Online Application Form for HCUP Products (<https://www.distributor.hcup-us.ahrq.gov/SpecialPages/Shoppingcart.aspx>). To access the eight types of database, HCUP users are required to complete the Online Application Form for HCUP Products which includes three components, the application, HCUP DUA training (<https://www.hcup-us.ahrq.gov/DUA/dua/index.html>) and signing a HCUP DUA. Users are required to sign one of two DUAs: (1) Nationwide or (2) state (hereafter referred to collectively as the HCUP DUA) after they complete the HCUP DUA training.

Information collected in the HCUP Online Application Form process will be used for two purposes only:

1. Business Transaction: In order to deliver the HCUP databases to the applicants, contact information is necessary for shipping the data on disk (or any other media used in the future) and payment collection.
2. Enforcement of the HCUP Data Use Agreement (DUA): The HCUP DUA contains several restrictions on use of the data. Most of these restrictions have been put in place to safeguard the privacy of individuals and establishments represented in the data. For example, data users can only use the data for research, analysis, and aggregate statistical reporting and are prohibited
