NATIONAL SCIENCE FOUNDATION

Notice of Intent To Renew a Current Information Collection

AGENCY: National Center for Science and Engineering Statistics, National Science Foundation.

ACTION: Notice and request for comments.

SUMMARY: The National Center for Science and Engineering Statistics (NCSES) within the National Science Foundation (NSF) is announcing plans to request renewal of the Higher Education Research and Development Survey. In accordance with the requirements of the Paperwork Reduction Act of 1995, we are providing opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting that OMB approve clearance of this collection for three years.

DATES: Written comments on this notice must be received by May 31, 2022 to be assured consideration. Comments received after that date will be considered to the extent practicable. Send comments to address below.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, W18253, Alexandria, Virginia 22314; telephone (703) 292–7556; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Title of Collection: Higher Education Research and Development Survey.

OMB Approval Number: 3145–0100.

Expiration Date of Current Approval: August 31, 2022.

Type of Request: Intent to seek approval to extend an information collection for three years.

Abstract: Established within NSF by the America COMPETES Reauthorization Act of 2010 § 505, codified in the NSF Act of 1950, as amended, the National Center for Science and Engineering Statistics (NCSES)—one of 13 principal federal statistical agencies—serves as a central Federal clearinghouse for the collection, interpretation, analysis, and dissemination of objective data on science, engineering, technology, and research and development for use by practitioners, researchers, policymakers, and the public.

The Higher Education Research and Development (R&D) Survey (formerly known as the Survey of R&D Expenditures at Universities and Colleges) originated in fiscal year (FY) 1954 and has been conducted annually since FY 1972. The survey represents one facet of the research and development component of NCSES's statistical program, which also includes R&D surveys on the business, federal government, higher education, state government, and nonprofit sectors.

Use of the Information: The proposed project will continue the annual survey cycle for three years. The Higher Education R&D Survey will provide continuity of statistics on R&D expenditures by source of funding, type of R&D (basic research, applied research, or development), and field of research, with separate data requested on research equipment by field. Further breakdowns are collected on funds passed through to subrecipients and funds received as a subrecipient, and on R&D expenditures by field from specific federal agency sources. The survey also requests total R&D expenditures funded from foreign sources, R&D within an institution's medical school, clinical

trial expenditures, R&D by type of funding mechanism (contracts vs. grants), and R&D by cost category (salaries, equipment, software, etc.). Since FY 2020, the survey has requested headcounts and full-time equivalents of R&D personnel (researchers, R&D technicians, and R&D support staff).

Data are published in NSF's annual publication series *Higher Education Research and Development*, available on the web at <http://www.nsf.gov/statistics/srvyherd/>.

Expected respondents: The FY 2022 Higher Education R&D Survey will be administered to approximately 650 institutions. In addition, a shorter version of the survey asking for R&D expenditures by source of funding and broad field will be sent to approximately 275 institutions spending at least \$150 thousand but less than \$1 million on R&D in their previous fiscal year. A short population review screener is also sent to approximately 125 institutions before the survey cycle to identify potential eligible institutions not already in the survey frame. Finally, a survey requesting R&D expenditures by source of funds, cost categories, and type of R&D will be administered to the 43 Federally Funded Research and Development Centers.

Estimate of burden: The survey is a fully automated web data collection effort and is handled primarily by administrators in university sponsored programs and accounting offices. To minimize burden, institutions are provided with an abundance of guidance and resources on the web and can respond via downloadable spreadsheet if desired. Each institution's record is pre-loaded with the 2 previous years of comparable data that facilitate editing and trend checking. Response to this voluntary survey has exceeded 95 percent each year.

The average burden estimate is 64 hours for the approximately 650 institutions reporting at least \$1 million in R&D expenditures, 8 hours for the approximately 275 institutions reporting less than \$1 million, 1 hour for the approximately 125 institutions in the population screener, and 11 hours for the 43 organizations completing the FFRDC survey. The total calculated burden across all forms is 44,398 hours.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity

of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: March 25, 2022.

Reports Clearance Officer, National Science Foundation.
