

(January 28, 2022), "Analysis of Low Wheelchair Seat Heights and Transfer Surfaces for Medical Diagnostic Equipment: Final Report" available at <https://www.access-board.gov/research/human/wheelchair-seat-height/>.

Announcement of Public Meeting

In light of these latest findings from the resampling analysis, the Access Board has decided to hold a public hearing to gather additional information on the low transfer height for MDE transfer surfaces from disability advocates, manufacturers of MDE, researchers and other stakeholders and interested parties. The Board is particularly interested in information on what the low height is for adjustable MDE products that are currently on the market and any changes or innovations in their design and engineering that may have occurred since the Board issued the MDE standards in 2017. The Board is aware of at least some examination tables and chairs that can adjust to a height of 17 inches or less. The Board is also interested in updated information on the incremental costs for the design or redesign and manufacture of examination tables and chairs and diagnostic imaging medical equipment with tables that can provide a low transfer height of 17 inches.

Christopher Kuczynski,

General Counsel, U.S. Access Board.
