

(vi) The procedures for filing an answer and requesting a mitigation meeting, including the date by which the answer must be received and the address to which it may be submitted; and

(vii) A statement that in the absence of a timely filed answer, the proposed debarment will become final 30 days after service of the notice of intent to debar.

(3) *Service.* The notice of intent to debar will be served by a method that demonstrates receipt, such as certified mail with return receipt or express courier delivery, by the entity identified in the notice of violation received from the Secretary of Labor. The date of service is the date of receipt.

(c) *Answer; request for mitigation meeting—(1) General.* Any entity upon which the notice has been served, or its authorized representative, may file with CBP an answer that indicates the specific reasons why the proposed debarment should be mitigated and whether a mitigation meeting is requested. If CBP grants a good cause extension pursuant to paragraph (c)(2)(iv) of this section, and no answer is timely filed, the proposed debarment automatically will become a final order of debarment when the time for filing an answer expires.

(2) *Answer filed; mitigation meeting requested.* If an answer is timely filed that requests mitigation and/or a mitigation meeting, CBP will determine a final debarment in accordance with paragraph (e) of this section.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would modify Class E airspace at Coeur D'Alene—Pappy Boyington Field, ID, to support IFR operations at the airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above.

Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2022-0253; Airspace Docket No. 21-ANM-09". Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021, and effective September 15, 2021. FAA Order JO 7400.11F is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11F lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying Class E surface airspace and Class E airspace extending upward from 700 feet above the surface at Coeur D'Alene—Pappy Boyington Field, ID.

The area north of the airport requires additional airspace to properly contain departures due to rising terrain adjoining the Class E surface area in the northeast. The FAA proposes to widen and extend both the Class E surface area and Class E airspace extending upward from 700 feet above the surface to properly contain departures to points 700 feet above the surface and 1,200 feet above the surface, respectively.

Furthermore, the FAA proposes to modify the Class E airspace south of the airport. Both the current southern extension to the Class E surface area and the Class E airspace extending upward from 700 feet require modification to properly contain the 1,000 foot and 1,500 foot points of the RNAV GPS RWY 2 IAP, respectively.

Additionally, the FAA proposes to modify the Class E airspace extending upward from 700 feet west of the airport to better contain the 1,500 foot point of the RNAV GPS RWY 6 IAP, and to account for rising terrain west of the airport.

Finally, the FAA proposes to make administrative changes to the current legal descriptions. The Class E airspace extending from 700 feet above the surface is defined on line 1 of the current description to be located in "WA" State, and requires amendment to show the correct State, annotated as "ID." Additionally, the legal description of the Class E airspace defined as a surface area uses the phrase "Notice to Airmen." This should be amended to read "Notice to Air Missions" to match the FAA's current definition of "NOTAM."

Class E2 and E5 airspace designations are published in paragraphs 6002 and 6005, respectively, of FAA Order JO 7400.11F, dated August 10, 2021, and effective September 15, 2021, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in FAA Order JO 7400.11.

FAA Order JO 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial, and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT

Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.
