

Federal Register (80 FR 28624) (the 2015 request for nominations notice).

Although that draft guidance was subsequently withdrawn in November 2017, FDA received over 30 comments containing nominations for multiple bulk drug substances in response to the 2015 request for nominations notice. FDA's approach for determining whether to include a bulk drug substance on the list described in the 2015 request for nominations notice was substantially the same as the approach described above for including a bulk drug substance on the "List of Bulk Drug Substances for Compounding Office Stock Drugs for Use in Nonfood-Producing Animals" in accordance with GFI #256. Therefore, and in keeping with our intention as stated in the 2019 request for nomination notice, the Agency is including certain of these nominated bulk drug substances on this List. For other of these nominated bulk drug substances, finished drugs containing the bulk drug substances in the appropriate dosage form and strength have subsequently been approved; thus, these nominated bulk drug substances will not appear on the List.

Some bulk drug substances were nominated in response to the 2015 request for nominations notice with insufficient supporting information. FDA subsequently searched for additional supporting information for these bulk substances, conducted further review, and added those with sufficient supporting information to the "List of Bulk Drug Substances for Compounding Office Stock Drugs for Use in Nonfood-Producing Animals."

In addition, on its own initiative, FDA has identified certain bulk drug substances that are used in minor species. Several have been evaluated and are included on the "List of Bulk Drug Substances for Compounding Office Stock Drugs for Use in Nonfood-Producing Animals." Those identified bulk drug substances still under evaluation are included on "Bulk Drug Substances Currently Under Review." As FDA continues to identify and evaluate bulk drug substances that are used in minor species, we also encourage outside nominations.
