For further information on procedures for filing information with Commerce through ACCESS and participating in scope inquiries, please refer to the Filing Instructions section of the Scope Ruling Application Guide, at https://access.trade.gov/help/Scope_Ruling_Guidance.pdf. Interested parties are advised to refer to the case segment in ACCESS as well as 19 CFR 351.225(f) for further information on the scope inquiry procedures, including the timelines for the submission of comments.

For rescinded administrative reviews of AD/CVD orders on Canada or Mexico, Commerce intends to issue assessment instructions to CBP no earlier than 41 days after the date of publication of this rescission notice in the **Federal Register**.

Notification to Importers

This notice serves as the only reminder to importers of merchandise subject to AD orders of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties and/or countervailing duties prior to liquidation of the relevant entries during the review period. Failure to comply with this requirement could result in the presumption that reimbursement of antidumping duties and/or countervailing duties occurred and the subsequent assessment of doubled antidumping duties.

ACTION: Notice of approval for the revised management plan for the Delaware National Estuarine Research Reserve.

SUMMARY: Notice is hereby given that the Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce approves the revised management plan for the Delaware National Estuarine Research Reserve. In accordance with applicable Federal regulations, the Delaware Department of Natural Resources and Environmental Control revised the reserve’s management plan, which replaces the plan previously approved in 2013.

ADDRESSES: The approved management plan can be downloaded or viewed at <https://documents.dnrec.delaware.gov/coastal/DNERR/2022-DNERR-Management-Plan.pdf>. The document is also available by sending a written request to the point of contact identified

below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Jean R. Brodeur, jean.brodeur@noaa.gov, 854-900-2575.

SUPPLEMENTARY INFORMATION: Pursuant to 15 CFR 921.33(c), a state must revise the management plan for its research reserve at least every five years. Changes to a reserve’s management plan may be made only after receiving written approval from the National Oceanic and Atmospheric Administration (NOAA). NOAA approves changes to management plans via notice in the **Federal Register**. On December 16, 2021, NOAA issued a notice in the **Federal Register** announcing a thirty-day public comment period for the proposed revision of the Delaware National Estuarine Research Reserve management plan (86 FR 71421). No comments were received.

The management plan outlines the reserve’s strategic goals and objectives; administrative structure; programs for conducting research and monitoring, education, and training; resource protection, restoration, and manipulation plans; public access and visitor use plans; consideration for future land acquisition; and facility development to support reserve operations. Since 2013, this research reserve has had an important impact on the local area and its communities. The reserve’s training program held 53 trainings, workshops or conferences with 27,851 contact hours with local constituents. The education program had 32,466 contact hours with 11,722 K-12 students and 23,599 public participants. Reserve volunteers donated 20,739 hours of time producing the full-time employee equivalent of 10.5 years of work. Some of those volunteer hours were spent recording 1,784,923 spawning horseshoe crabs on the three beaches that the reserve monitors. Research and monitoring efforts produced 15 peer-reviewed publications that used this reserve’s infrastructure and data. The mini-grant opportunity, available through their research and monitoring program, distributed \$183,766 of funding to local, Delaware-based researchers, many of which were early career faculty. Seventy-six acres of land within this reserve’s boundary have been enhanced
