BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Specified Fishing Agreements for U.S. Territorial Catch, Effort, and Allocation Limits

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on January 20th, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: NOAA National Marine Fisheries Service (NMFS).

Title: Specified Fishing Agreements for U.S. Territorial Catch, Effort, and Allocation Limits.

OMB Control Number: 0648-0689.

Form Number(s): None.

Type of Request: Regular (extension of a current collection of information).

Number of Respondents: 3.

Average Hours per Response: 30 hours per agreement; 15 hours per appeal.

Total Annual Burden Hours: 90.

Needs and Uses: The Fishery Ecosystem Plan for Pacific Pelagic Fisheries of the Western Pacific Region (FEP) and regulations at 50 CFR 665.819 allow the Western Pacific Fishery Management Council (Council) to recommend and NMFS to implement catch or fishing effort limits for pelagic fisheries in the Territory of American Samoa, the Territory of Guam, and the Commonwealth of the Northern Mariana Islands (CNMI) (hereinafter, "territory" or "territories"). The regulations further allow NMFS to authorize the government of each territory to allocate a portion of its catch or fishing effort limit to U.S. fishing vessels through specified fishing agreements between the vessels and the respective territories. Payments made by the vessels under these agreements support fisheries development in the territories.

Specified fishing agreements include the identity of fishing vessels subject to the agreement, the amount (weight) of fish or fishing effort to which the agreement applies, and any amount paid under the agreement. Additionally, an authorized official of the U.S. territory and each vessel owner or their designated representative must sign the agreements. There is no specified form for an agreement.

NMFS uses the information in the agreements to determine vessel eligibility, and ensure the amount of fish or fishing effort allocated under the agreement is consistent with the FEP, the Magnuson-Stevens Fishery Conservation and Management Act, other applicable laws, and the conservation needs of the fish stock.

The request also includes a change to the collection's title for improved clarity, from "Amendment 7 to the Fishery Ecosystem Plan for Pelagic Fisheries of the Western Pacific Region—U.S. Territorial Catch and Fishing Effort Limits" to "Specified Fishing Agreements for U.S. Territorial Catch, Effort, and Allocation Limits."

Affected Public: Individuals or households; business or other for-profit organizations; State or Territorial governments.

Frequency: Annual.

Respondent's Obligation: Required to Obtain or Retain Benefits.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*; 50 CFR 665.819).

This information collection request may be viewed at [reginfo.gov](https://www.reginfo.gov). Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0689.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XB866]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Geophysical Surveys of the Guerrero Gap in the Eastern Tropical Pacific

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization (IHA).

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, NMFS has issued an IHA to the Lamont-Doherty Earth Observatory (L–DEO) to incidentally harass marine mammals during geophysical surveys of the Guerrero Gap off the coast of Mexico in the Eastern Tropical Pacific.

DATES: This authorization is effective from May 2, 2022 through May 1, 2023.

FOR FURTHER INFORMATION CONTACT: Amy Fowler, Office of Protected Resources, NMFS, (301) 427–8401. Electronic copies of the application and supporting documents, as well as a list of the references cited in this document,

may be obtained online at: <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the “take” of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are proposed or, if the taking is limited to harassment, a notice of a proposed incidental harassment authorization is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other “means of effecting the least practicable adverse impact” on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to in shorthand as “mitigation”); and requirements pertaining to the mitigation, monitoring and reporting of the takings are set forth.

The definitions of all applicable MMPA statutory terms cited above are included in the relevant sections below.

Summary of Request

On August 21, 2021, NMFS received a request from L–DEO for an IHA to take marine mammals incidental to geophysical surveys of the Guerrero Gap off the coast of Mexico in the Eastern Tropical Pacific (ETP). The application was deemed adequate and complete on December 14, 2021. L–DEO’s request is for take of a small number of 30 species of marine mammals by Level B harassment and, for two of those species, by Level A harassment. NMFS published a notice of proposed IHA for public review and comment on January 12, 2022 (87 FR 1992). Neither L–DEO nor NMFS expects serious injury or

mortality to result from this activity and, therefore, an IHA is appropriate.

Description of Planned Activity

Researchers from L–DEO, University of Texas Institute of Geophysics (UTIG), and Northern Arizona University (NAU), with funding from the National Science Foundation (NSF), and in collaboration with researchers from the National Autonomous University of Mexico (Universidad Nacional Autonoma de Mexico or UNAM) and Kyoto University, plan to conduct high-energy seismic surveys from the research vessel (R/V) *Marcus G. Langseth (Langseth)* in and around the Guerrero Gap off western Mexico, in the ETP in the mid- to late-spring of 2022. The study uses two-dimensional (2–D) seismic surveying to quantify incoming plate hydration and examine the role of fluids on megathrust slip behavior in and around the Guerrero Gap of the Middle America Trench. L–DEO plans to conduct two different methods of seismic acquisition, multi-channel seismic (MCS) using a hydrophone streamer and refraction surveys using ocean bottom seismometers (OBSs). A total of 3,600 kilometers (km) of transect lines would be surveyed (2,230 km of 2–D MCS reflection data and 1,370 km of OBS refraction data). Approximately 62 percent of the total survey effort would be MCS surveys, with the remaining 38 percent using OBSs. The planned surveys use a 36-airgun towed array with a total discharge volume of ~6600 cubic inches (in³) as an acoustic source, acquiring return signals using both a towed streamer as well as OBSs. The total survey duration will be approximately 48 days, including approximately 20 days of seismic survey operations, 3 days of transit to and from the survey area, 19 days for equipment deployment/recovery, and 6 days of contingency time for poor weather, etc.

The majority of the 2–D seismic surveys would occur within the Exclusive Economic Zone (EEZ) of Mexico, including territorial seas, and a small portion would occur in International Waters. Approximately 6 percent of the total survey effort would occur in Mexican territorial waters. Note that the MMPA does not apply in Mexican territorial waters. L–DEO is subject only to Mexican law in conducting that portion of the survey. However, NMFS has calculated the expected level of incidental take in the entire activity area (including Mexican territorial waters) as part of the analysis supporting our determination under the MMPA that the activity will have a negligible impact on the affected species or stocks (see Estimated Take and
