k. *Description of Request:* The applicant proposes to temporarily amend Article 402 of the license to allow for the drawdown of the impoundment elevation. The drawdown is necessary for the licensee to replace the rubber dam components at the project. In particular, the licensee requests a temporary amendment of Article 402 to maintain the impoundment elevation at up to 12 inches below the spillway crest (65.6 feet National Geocentric Vertical Datum 1929) unless otherwise directed by the New York State Canal Corporation until the completion of the replacement and upgrade of the remaining bladders. The licensee anticipates the drawdown to occur between mid-June to mid-October 2022. The licensee would continue to operate the project in run-of-river mode except to satisfy navigation requests and provide the seasonal minimum bypass

flow requirements below the project except during periods when the impoundment elevation is lower than the sill of the sluice gate.
