Abstract: Owners and operators of existing and new facilities that are engaged in asphalt processing or asphalt roofing manufacturing are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the applicable specific standards in 40 CFR part 63 subpart LLLLL. This includes submitting initial notifications, performance tests and periodic reports and results, and any period during which the add-on control system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: 5900-567.

Respondents/affected entities: Owners or operators of asphalt processing or asphalt roofing manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart LLLLL).

Estimated number of respondents: 8 (total).

Frequency of response: Initially, semiannually, periodically.

Total estimated burden: 4,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$558,000 (per year), which includes \$84,900 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. This ICR merges the 'burdens' from EPA ICR

Number 2029.08 and EPA ICR No. 2598.02 (OMB No. 2060-0724), and from the ICR that the RTR amendments finalized on March 12, 2020 at 85 FR 14526. The prior RTR amendments revised the rule to add periodic testing requirements which increased burden, and resulted in an increase in periodic testing costs and an increase in operation and maintenance (O&M) costs for control devices. The regulations are not anticipated to change over the next three years. The growth rate for this industry is very low or non-existent. There are no changes in the capital/startup costs as no new sources have been constructed.

Director, Regulatory Support Division.
