other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Understanding Economic Risk for Low Income Families: Economic Security, Program Benefits, and Decisions about Work.

Type of Collection: New.

OMB No.: 0990—NEW—Office of the Assistant Secretary for Planning and Evaluation.

*Abstract:* The primary purpose of this study is to identify the risks that federal

program benefit recipients weigh when faced with an opportunity to increase earnings, including benefit reductions, earnings instability, and the ease of regaining lost benefits if needed.

The study will use a discrete choice experiment to explore the importance of these considerations when low-income individuals are presented with a hypothetical opportunity to increase earnings. Statistical analysis will explore interactions between factors and threshold effects. The focus population will be persons currently receiving benefits from at least one of the following programs: Supplemental Nutrition Assistance Program (SNAP), Medicaid/Children's Health Insurance Program (CHIP), housing assistance, Child Care Development Fund (CCDF) subsidies, and/or Temporary Assistance for Needy Families (TANF). The study will explore whether different

preferences are exhibited by parents with children and by persons of different races and ethnicities.

The results of this study will provide HHS with a better understanding of the economic risks that people weigh when they make decisions about increasing earnings, which will inform HHS policy and programs at large, and further lines of research around benefit programs and employment decisions.

The data will be collected once, using primarily a web-based survey, from a sample of low-income persons receiving one or more federal benefit programs. Respondents will be asked to review the vignette and choose whether they think the hypothetical individual should accept the earnings increase. In addition, the questionnaire includes follow-up questions for each vignette/experimental condition, and a set of demographic questions.

### ANNUALIZED BURDEN HOUR TABLE

| Number of respondents | Number of responses per respondents | Average<br>burden per<br>response<br>(in hours) | Total burden<br>hours |
