The Petitioners also made three claims in the Petition on the Utilities Permit consisting of inadequate monitoring and estimation of VOC emissions from the wastewater system, inadequate monitoring and emissions calculations of particulate matter (PM) emissions from the cooling towers, and an inadequate reasoned explanation for why the proposed permit ensures compliance with the VOC and PM limits at issue.

On March 18, 2022, the EPA Administrator issued an Order granting all claims to both permits in the respective Petitions. The Order explains the basis for EPA's decision.
