###### Abstract

This request is for a revision and extension of a currently approved information collection and is sponsored by NOAA's Southeast Fisheries Science Center (SEFSC).

The objective of the data collection effort under OMB Control Number 0648-0769 is to understand how Florida anglers respond to changes in trip costs and/or fishing regulations in the Gulf of Mexico and Atlantic Ocean. The population to be surveyed consists of those anglers who fish in the Gulf of Mexico or Atlantic Ocean from Florida for reef fish species. The sample will be drawn from the list of Florida anglers with the State Reef Fish Angler license designation and matched to the state of Florida's boat registration list. The sample is targeted to anglers who fish for reef species who fish from a boat given that most reef species occur offshore.

#### SUPPLEMENTARY INFORMATION:

##### Background

The MMPA prohibits the “take” of marine mammals, with certain exceptions. sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed incidental take authorization may be provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other “means of effecting the least
