## NATIONAL SCIENCE FOUNDATION

### Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978

**AGENCY:** National Science Foundation.

**ACTION:** Notice of permit applications received.

**SUMMARY:** The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act in the Code of Federal Regulations. This is the required notice of permit applications received.

**DATES:** Interested parties are invited to submit written data, comments, or views with respect to this permit application by June 27, 2022. This application may be inspected by interested parties at the Permit Office, address below.

**ADDRESSES:** Comments should be addressed to Permit Office, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, Virginia 22314 or [ACApermits@nsf.gov](mailto:ACApermits@nsf.gov).

**FOR FURTHER INFORMATION CONTACT:** Andrew Titmus, ACA Permit Officer, at the above address, 703–292–4479.

**SUPPLEMENTARY INFORMATION:** The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541, 45 CFR 671 as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

#### Application Details

*Permit Application: 2023–003*

1. *Applicant:* Birgitte McDonald, Moss Landing Marine Labs, 8272 Moss Landing Rd., Moss Landing, CA 95039

#### Activity for Which Permit Is Requested

Take, Harmful Interference, Enter in Antarctic Special Protected Area, Import to USA. The applicant requests authorization to enter Antarctic Specially Protected Area (ASP) No. 124, Cape Crozier, to conduct physiological and ecological studies on emperor penguins (*Aptenodytes forsteri*). The two-part project aims to address fundamental information gaps about the foraging ecology and habitat use of emperor penguins at two stages of their life history. During phase one of the research, the applicant proposes capturing up to 48 adult emperor penguins as they depart colonies to forage during late chick-rearing. Captured penguins will undergo morphological and physiological sampling and will be fitted with instrumentation used for collecting foraging data. During the second phase of research, the applicant proposes capturing up to 44 adult emperor penguins during early reproduction phases, this second group of individuals will be fitted with satellite-linked instrumentation and tissue samples will

be collected. Some of the data loggers will be retrieved from individuals at the end of the study, while others will detach during subsequent molting.

#### Location

Cape Crozer, ASPA No. 124; Eastern Ross Sea, Antarctica

#### Dates of Permitted Activities

October 1, 2022–May 30, 2023

## OFFICE OF SCIENCE AND TECHNOLOGY POLICY

### Call for Public Comment on the Draft U.S. Global Change Research Program (USGCRP) Decadal Strategic Plan, 2022–2031

**AGENCY:** Office of Science and Technology Policy (OSTP).

**SUMMARY:** The U.S. Global Change Research Program (USGCRP), in collaboration with the Office of Science and Technology Policy (OSTP), requests comment from the public on its draft Decadal Strategic Plan.

**DATES:** Interested persons and organizations are invited to submit comments before 11:59 p.m. ET, 15 July 2022.

**ADDRESSES:** Submit comments electronically via the USGCRP R&C System (<https://review.globalchange.gov>) by the deadline. Due to time constraints, mailed paper submissions will not be accepted. The review system will be taken off-line at close of the review window, so there will be no means to submit late comments.

**Instructions:** Response to this notice is voluntary. Responses to this notice may be used by the government for program planning on a non-attribution basis. OSTP therefore requests that no business proprietary information or copyrighted information be submitted in response to this notice. Please note that the U.S. Government will not pay for response preparation, or for the use of any information contained in the response.

**FOR FURTHER INFORMATION CONTACT:** Direct technical questions to David Dokken (Senior Program Officer) at [ddokken@usgcrp.gov](mailto:ddokken@usgcrp.gov). Process concerns should be addressed to Michael Kuperberg (USGCRP Executive Director) at [mkuperberg@usgcrp.gov](mailto:mkuperberg@usgcrp.gov).

**SUPPLEMENTARY INFORMATION:** With the implementation phase of USGCRP's

previous plan winding down (<https://downloads.globalchange.gov/strategic-plan/2012/usgcrp-strategic-plan-2012.pdf>), work began on a successor in the spring of 2021. The National Science and Technology Council provided USGCRP with guidance to produce a plan that was short (30 pages) and accessible to an informed lay reader. In pursuit of a high-level, non-technical narrative, over the past year, inputs were solicited from USGCRP member agencies and interagency working groups, as well as external organizations such as the National Academies of Sciences, Engineering, and Medicine (NASEM). Listening sessions were conducted within the Federal community and via NASEM external outreach on the Program's behalf. Public comment on a draft prospectus was sought (22 November 2021–11 January 2022) to determine if the overall vision resonated with intended audiences and if the identified strategic pillars adequately established near-term priorities while providing the flexibility to address longer term challenges. The draft narrative is now being provided both to the public and to NASEM to seek input.

USGCRP seeks feedback on program priorities and accompanying narrative in the strategic pillar sections. Respondents should consider (i) ideas on emerging, large-scale scientific questions related to global change and/or response, especially those where interagency collaboration will be critical; (ii) specific information on how science is or is not being used to inform societal response to climate change, and why; and (iii) knowledge gaps and obstacles to implementing scientific tools or knowledge.

Individuals wishing to participate in the public review of the draft 2022–2031 USGCRP Strategic Plan are encouraged to register via the USGCRP Review and Comment (R&C) System (<https://review.globalchange.gov>). The document and instructions are available from 20 May to 15 July 2022.

The U.S. Global Change Research Program (USGCRP) coordinates research across 13 Federal agencies to understand the human-induced and natural processes that influence the total Earth system—the atmosphere, land, water, ecosystems, and people. USGCRP was established by Presidential Initiative in 1989 and mandated by Congress in the Global Change Research Act (GCRA) of 1990 (Sec 104, Pub. L. 101–606; <https://www.globalchange.gov/about/legal-mandate>). The GCRA calls for a 10-year plan with periodic

updates. More detail on USGCRP strategic planning processes to date can be found at <https://www.globalchange.gov/engage/process-products/strategic-planning>. USGCRP builds on a foundation of Federal investments in research and development to ensure that America leads in basic and applied global change research.

The draft Plan was prepared and vetted by Federal agency officials comprising the Subcommittee on Global Change Research (SGCR), which provides overall direction and executive oversight of the Program. SGCR, whose membership includes representatives of scientific and implementing agencies, is a standing body of the Committee on Environment, a component of the National Science and Technology Council.
