* The 2016–2021 ITRs were established by a final rule published at 81 FR 52276, August 5, 2016.

On August 1, 2019, the Service published in the **Federal Register** a final rule (84 FR 37716) establishing regulations that allow us to authorize the nonlethal, incidental, unintentional take of small numbers of northern sea otters (*Enhydra lutris kenyoni*) during year-round oil and gas industry exploration, development, production, and transportation activities in Cook Inlet, Alaska. The rule established subpart K in part 18 of title 50 of the

CFR and is effective through August 1, 2024. The rule prescribes a process under which we issue LOAs to applicants conducting activities as described under the provisions of the regulations.

Each LOA stipulates conditions or methods that are specific to the activity and location. Holders of the LOAs must use methods and conduct activities in a manner that minimizes to the greatest extent practicable adverse impacts on

northern sea otters and their habitat and on the availability of northern sea otters for subsistence purposes. No intentional take or lethal incidental take is authorized under these regulations.

In accordance with section 101(a)(5)(A) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*) and our regulations at 50 CFR part 18, subpart K, in 2021, we issued an LOA to the following company in Cook Inlet, Alaska, as shown in table 2.
