Background

Section 9 of the ESA prohibits the taking of a species listed as endangered or threatened. The ESA defines "take" to mean to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. The FWS may issue permits, under limited circumstances, to take listed species incidental to otherwise lawful activities pursuant to section 10(a)(1)(B) of the ESA and implementing regulations (50 CFR 17.22(b) and 17.32(b)).

On August 16, 2020, NMFS and FWS received separate applications from Port Blakely for ITPs to authorize take of the above species that may occur incidental to Port Blakely's timber harvest, silviculture, road management, and conservation activities on approximately 30,000 acres of its John Franklin Eddy Forestlands in the Clackamas River and Molalla River Basins of Oregon. In association with the applications, the applicant submitted a HCP, which specifies the impacts to the species that will likely result from implementing the covered activities, steps that Port Blakely will take to minimize and mitigate such impacts, procedures to account for unforeseen or changed circumstances, a plan for monitoring and adaptive management, and a description of funding assurances. Authorization for take of the species not currently listed under the ESA addressed by the HCP would be included in the ITP proposed for issuance by FWS; the take authorization would be in effect for one or more of the species if the FWS lists the species during the permit term.

The proposed issuance of the ITPs is considered a Federal action under NEPA, and NMFS prepared a draft environmental assessment (EA) to analyze the potential impacts on the human environment in accordance with the requirements of NEPA, with input from FWS as a cooperating agency. Further information regarding the Draft EA is described in the NMFS notice of availability.

Next Steps

After the public comment period ends (see **DATES**), FWS and NMFS will each evaluate the permit applications, associated documents, and any comments received to make their permit decisions based on the statutory and regulatory criteria of the ESA. Each agency will document its determination independently, in separate ESA section 10 findings documents and ESA Section 7 biological opinions. NMFS will also finalize the EA and determine whether the proposed action warrants a finding of no significant impact, or whether an environmental impact statement should be prepared pursuant to NEPA.
