

a category of actions that do not individually or cumulatively have a significant effect on the human environment. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

This technical amendment is categorically excluded under paragraphs A3 and L54 of Appendix A, Table 1 of Department of Homeland Security Instruction Manual 023-01-001-01, Rev. 1. Paragraph A3 pertains to the promulgation of rules, issuance of rulings or interpretations, and the development and publication of policies, orders, directives, notices, procedures, manuals, advisory circulars, and other guidance documents of the following nature: (a) Those of a strictly administrative or procedural nature; (b) those that implement, without substantive change, statutory or regulatory requirements; (c) those that implement, without substantive change, procedures, manuals, and other guidance documents; and (d) those that interpret or amend an existing regulation without changing its environmental effect. Paragraph L54 pertains to regulations which are editorial or procedural. This technical amendment involves non-substantive technical, organizational, and conforming amendments to existing Coast Guard regulations.

#### List of Subjects in 46 CFR Part 4

Administrative practice and procedure, Drug testing, Investigations, Marine safety, National Transportation Safety Board, Nuclear vessels, Radiation protection, Reporting and recordkeeping requirements, Safety, Transportation.

For the reasons discussed in the preamble, the Coast Guard amends 46 CFR part 4 as follows:

#### PART 4—MARINE CASUALTIES AND INVESTIGATIONS

■ 1. The authority citation for part 4 is revised to read as follows:

**Authority:** 14 U.S.C. 102; 43 U.S.C. 1333; 46 U.S.C. 2103, 2303A, 2306, 6101, 6301, 6305, 70034; 50 U.S.C. 198; DHS Delegation 00170.1, Revision No. 01.2. Subpart 4.40 issued under 49 U.S.C. 1131(a)(1)(E).

#### § 4.40-5 [Amended]

■ 2. In § 4.40-5 amend paragraph (d)(3) by removing the text “\$2,000,000” and adding, in its place, the text “\$500,000”.

Dated: June 6, 2022.

**Michael Cunningham,**

*Chief, Office of Regulations and Administrative Law, U.S. Coast Guard.*

#### DEPARTMENT OF COMMERCE

#### National Oceanic and Atmospheric Administration

#### 50 CFR Part 300

[Docket No. 220325-0079; RTID 0648-XC089]

#### Pacific Halibut Fisheries; Catch Sharing Plan; Inseason Action

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Temporary rule; inseason adjustment; request for comments.

**SUMMARY:** This document announces four additional season dates for Pacific halibut recreational fisheries in the International Pacific Halibut Commission’s regulatory Area 2A off Washington, Oregon, and California. Specifically, this action adds the dates of June 10, 17, and 24 for the Washington North Coast subarea, June 28 and 30 for the Washington South Coast subarea, and June 13 and 20 for the Columbia River subarea, which includes waters off Washington and Oregon. This action is intended to conserve Pacific halibut and provide angler opportunity where available.

**DATES:** This action is effective June 9, 2022, through September 30, 2022. Submit comments on or before June 29, 2022.

**ADDRESSES:** Submit your comments, identified by NOAA-NMFS-2022-0003, by either of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and enter NOAA-NMFS-2022-0003 in the Search box. Click on the “Comment” icon, complete the required fields, and enter or attach your comments.
- **Mail:** Submit written comments to Scott M. Rumsey, c/o Kathryn Blair, West Coast Region, NMFS, 1201 NE Lloyd Blvd., Suite 1100, Portland, OR, 97232.

**Instructions:** NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the comment period ends. All comments

received are a part of the public record and NMFS will post them for public viewing on [www.regulations.gov](http://www.regulations.gov) without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender is publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

**Docket:** This rule is accessible via the internet at the Office of the Federal Register website at <https://www.federalregister.gov/>. Background information and documents are available at the NOAA Fisheries website at <https://www.fisheries.noaa.gov/action/2022-pacific-halibut-catch-sharing-plan> and at the Pacific Fishery Management Council’s (Council) website at <https://www.pcouncil.org>. Other comments received may be accessed through [www.regulations.gov](http://www.regulations.gov).

#### FOR FURTHER INFORMATION CONTACT:

Joshua Lindsay, phone: 562-980-4034, fax: 562-980-4018, or email: [joshua.lindsay@noaa.gov](mailto:joshua.lindsay@noaa.gov).

**SUPPLEMENTARY INFORMATION:** On April 1, 2022, NMFS published a final rule approving changes to the Pacific halibut Area 2A Catch Sharing Plan and implementing recreational (sport) management measures for 2022 (87 FR 19007), as authorized by the Northern Pacific Halibut Act of 1982 (16 U.S.C. 773-773(k)). The 2022 Catch Sharing Plan provides a recommended framework for NMFS’ annual management measures and subarea allocations based on the 2022 Area 2A Pacific halibut catch limit of 1,490,000 pounds (lb) (675.9 metric tons (mt)) set by the International Pacific Halibut Commission (IPHC). These Pacific halibut management measures include recreational fishery season dates and subarea allocations.

Federal regulations at 50 CFR 300.63(c), “Flexible Inseason Management Provisions for Sport Halibut Fisheries in Area 2A,” allow the NMFS’ Regional Administrator to modify annual regulations during the season. These inseason provisions allow the Regional Administrator to modify sport (recreational) fishing periods, bag limits, size limits, days per calendar week, and subarea quotas, if it is determined it is necessary to meet the allocation objectives and the action will not result in exceeding the catch limit.

NMFS has determined that, due to lower than expected landings in portions of Washington and Oregon, specifically the Washington North and South Coast subareas and Columbia

River subarea, inseason action to modify the 2022 annual regulations for the recreational fishery is warranted at this time to provide additional opportunity for fishery participations to achieve the Area 2A allocations as published in the final rule (87 FR 19007; April 1, 2022). As stated above, inseason modification of the fishing season is authorized by Federal regulations at 50 CFR 300.63(c). After consulting with IPHC, the Council, the Washington Department of Fish and Wildlife (WDFW), and the Oregon Department of Fish and Wildlife (ODFW), NMFS determined the following inseason action is necessary to meet the management objective of attaining the subarea allocations, and is consistent with the inseason management provisions allowing for the modification of sport fishing periods and sport fishing days per calendar week. Notice of these additional dates and closure of the fisheries will also be announced on the NMFS hotline at 206-526-6667 or 800-662-9825.

#### **Inseason Action**

*Description of the action:* This inseason action implements three additional fishing dates for the Washington North Coast, two additional fishing dates for the Washington South Coast, and two additional dates for Columbia River subareas during the 2022 recreational fishery.

*Reason for the action:* The purpose of this inseason action is to provide additional opportunity for anglers in the Washington North Coast subarea on June 10, 17, and 24, the South Coast subarea on June 28 and 30, and the Columbia River subarea on June 13 and 20. The recreational fishery in these subareas opened on May 5, 2022. NMFS has determined that these additional dates are warranted due to lower than expected landings through May 2022, and the expectation that a substantial amount of subarea allocation will go unharvested without additional fishing dates. As of May 27, anglers in the Washington North and South Coast and Columbia River subareas have harvested 35,066 lb (15.91 mt) of the 221,439 lb (100.44 mt) allocations (16 percent), leaving 186,373 lb (84.54 mt) remaining (84 percent of the subarea allocation). This is a result of poor weather and ocean conditions preventing anglers from safely participating in the recreational fishery off the coast of Washington and the area off of the Columbia River. For reference, by the end of May 2021, fishery participants in the Washington North and South Coast and Columbia River subareas had attained 74 percent of the available recreational allocation. Without the

additional fishing days in this action, the season dates implemented in the April 1, 2022 (87 FR 19007), final rule would likely result in substantial unharvested allocation in these subareas.

After consulting with WDFW and ODFW, it was determined that in order for anglers to have the opportunity to achieve the combined subarea allocations in Washington and off the Columbia River, and with little risk of the subarea or coastwide allocations being exceeded, additional season dates were warranted for participants in the Washington North and South Coast and Columbia River subareas. Therefore, through this action NMFS is announcing new season dates in June that were not previously implemented in the April 1, 2022, final rule (87 FR 19007). Specifically, the additional season dates for the Washington North Coast subarea are June 10, 17, and 24, Washington South Coast are June 28 and 30, and June 13 and 20 for the Columbia River subarea.

Notice of these additional dates will also be announced on the NMFS hotline at 206-526-6667 or 800-662-9825.

Weekly catch monitoring reports for the recreational fisheries in Washington, Oregon, and California are available on their respective state Fish and Wildlife agency websites. NMFS and the IPHC will continue to monitor recreational catch obtained via state sampling procedures until NMFS has determined there is not sufficient allocation for another full day of fishing, and the area is closed by the IPHC, or the season closes on September 30, whichever is earlier.

#### **Classification**

NMFS issues this action pursuant to the Northern Pacific Halibut Act of 1982. This action is taken under the regulatory authority at 50 CFR 300.63(c), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(3)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest. WDFW and ODFW provided updated landings data to NMFS on May 27, 2022, showing that the fishery participants in the recreational fishery off of Washington had only caught 16 percent of Washington North and South Coast and the Columbia River subarea's combined allocations. NMFS uses fishing rates from previous years to determine the number of recreational fishing dates needed to attain subarea allocations. The level of attainment of the allocation

for 2022 is substantially lower than past years for this same point in time, and was not anticipated when the 2022 final rule setting the 2022 recreational fishery season dates was developed. This action should be implemented as soon as possible to allow fishery participants to take advantage of the additional fishing dates prior to the end of the season. As the fishery closes on September 30, 2022, implementing this action through proposed and final rulemaking would limit the benefit this action would provide to fishery participants. Without implementation of additional season dates, the Washington North and South Coast and Columbia River subarea allocations are unlikely to be harvested, limiting economic benefits to the participants and not meeting the goals of the Catch Sharing Plan and the 2022 management measures. It is necessary that this rulemaking be implemented in a timely manner so that planning for these new fishing days can take place, and for business and personal decision making by the regulated public impacted by this action, which includes recreational charter fishing operations, associated port businesses, and private anglers who do not live near the coastal access points for this fishery, among others. To ensure the regulated public is fully aware of this action, notice of this regulatory action will also be provided to anglers through a telephone hotline, news release, and by the relevant state fish and wildlife agencies. NMFS will receive public comments for 15 days after publication of this action, in accordance with 50 CFR 300.63(c)(4)(ii). No aspect of this action is controversial, and changes of this nature were anticipated in the process described in regulations at 50 CFR 300.63(c).

For the reasons discussed above, there is also good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effective date and make this action effective immediately upon filing for public inspection, as a delay in effectiveness of this action would constrain fishing opportunity and be inconsistent with the goals of the Catch Sharing Plan and current management measures, as well as potentially limit the economic opportunity intended by this rule to the associated fishing communities. NMFS regulations allow the Regional Administrator to modify sport fishing periods, bag limits, size limits, days per calendar week, and subarea quotas, provided that the action allows allocation objectives to be met and will not result in exceeding the catch limit for the subarea. NMFS recently received information on the progress of landings in the recreational

fisheries in Washington subareas, indicating additional dates should be added to the fishery to ensure optimal and sustainable harvest of the subarea allocation. As stated above, it is in the public interest that this action is not

delayed, because a delay in the effectiveness of these new dates would not allow the allocation objectives of the recreational Pacific halibut fishery to be met.

Dated: June 9, 2022.
