

DEPARTMENT OF VETERANS AFFAIRS**Privacy Act of 1974; System of Records**

AGENCY: Veterans Experience Office, Department of Veterans Affairs (VA).

ACTION: Notice of a new system of records.

SUMMARY: The Privacy Act of 1974 requires that all agencies publish in the **Federal Register** a notice of the existence and character of their systems of records. Notice is hereby given that the Department of Veterans Affairs (VA) is establishing a new system of records entitled “Veterans Affairs Profile-VA” (VA Profile) (192VA30). This system of records is an enterprise Master Data Management (MDM) solution that modernizes VA systems by ensuring VA customer data is synchronized and shared across the VA, regardless of the channel used to provide the information. This system of records contains VA customer contact information to support a range of business activities that are used by Veterans, eligible beneficiaries, other VA customers, and the different administrations supporting VA customers.

DATES: Comments on this new system of records must be received no later than 30 days after date of publication in the **Federal Register**. If no public comment is received during the period allowed for comment or unless otherwise published in the **Federal Register** by VA, the new system of records will become effective a minimum of 30 days after the date of publication in the **Federal Register**. If VA receives public comments, VA shall review the comments to determine whether any changes to the notice are necessary.

FOR FURTHER INFORMATION CONTACT: Trisha Dang, Veterans Experience Office (VEO), Department of Veterans Affairs, 810 Vermont Ave NW, Building 810, Washington DC 20420; Telephone (202) 461-9898; email trisha.dang@va.gov.

SUPPLEMENTARY INFORMATION: VA Profile is an enterprise Master Data Management (MDM) solution designed to provide a comprehensive VA customer Profile and to enable seamless interaction with authoritative sources of customer data. Starting with contact information, VA Profile will ensure that the Veterans Health Administration (VHA), the Veterans Benefits Administration (VBA), and the National Cemetery Administration (NCA) have access to accurate and timely information about Veterans and eligible

beneficiaries. VA Profile will facilitate the updating of Veterans information, providing a complete view of their Master Record, enforce data specifications and data quality for each assigned VA Common Information Subject Area, and ensure key data is available and usable across the VA enterprise. Benefits of VA Profile for the Veteran include increased consistency, accuracy and timeliness of information received from VA; improved customer experience; enhanced VA customer engagement; and reduced burden to VA customers providing the same information multiple times to the VA.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

The VA Profile system will utilize both Government and Commercial Off-the Shelf (GOTS) and (COTS) platforms that will be hosted initially at the VA Austin Information Technology Center in Austin, TX. The platform will be Trusted internet Connection (TIC) certified and Federal Risk and Authorization Management Program (FedRAMP) certified and meet all requirements for Federal Information Security Management Act of 2002 (FISMA) Moderate compliance. Hosting transitioned to a FedRAMP certified VA Government Cloud (GovCloud) site in early Federal Fiscal Year (FFY) 2020 and meets all requirements for Federal Information Security Management Act of 2002 (FISMA) High compliance. Records will be maintained at an OI&T approved VA sponsored data warehouse location via secured cloud storage.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records may be retrieved by assigned identifiers, such as an internal entry number of a partner system that maintains information on the individuals. Only those with assigned rights, as defined in their SSO login, will have access to records at a specific record level. Aggregated, non-attributional data will be retrieved via geolocation and provided to management at those locations.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

VA Profile records are maintained and disposed of in accordance with records disposition authority approved by the Archivist of the United States. The records are disposed of in accordance with General Records Schedule 20, item 4. Item 4 provides for deletion of data files when the agency determines that the files are no longer needed for administrative, legal, audit, or other operational purposes.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access to and use of national administrative databases, warehouses, data marts and cloud storage sites are limited to those persons whose official duties require such access, and the VA has established security procedures to ensure that access is appropriately limited. Information security officers and system data stewards review and authorize data access requests. VA regulates data access with security software that authenticates users and requires individually unique codes and passwords. VA provides information security training to all staff and instructs staff on the responsibility each person has for safeguarding data confidentiality.

VA maintains Business Associate Agreements and Non-Disclosure Agreements with contracted resources to maintain confidentiality of the information.

Physical access to computer rooms housing national administrative databases, warehouses, and data marts is restricted to authorized staff and protected by a variety of security devices. Unauthorized employees, contractors, and other staff are not allowed in computer rooms. The Federal Protective Service or other security personnel provide physical security for the buildings housing computer rooms and data centers.

Data transmissions between operational systems and national administrative databases, warehouses, and data marts maintained by this system of record are protected by state-of-the-art telecommunication software and hardware. This may include firewalls, intrusion detection devices, encryption, and other security measures necessary to safeguard data as it travels across the VA Wide Area Network.

In most cases, copies of back-up computer files are maintained at off-site locations.

RECORD ACCESS PROCEDURES:

An individual (or duly authorized representative of such individual) who

seeks access to or wishes to contest records maintained under his or her name or other personal identifier may write or call the individual listed under Notification Procedure below.

CONTESTING RECORD PROCEDURES:
