

7. *Period Covered:* Each shortage situation is approved for one program year cycle only. However, any previously approved shortage situation not filled in a given program year may be resubmitted as a retained (carry-over) nomination. Retained (carry-over) shortage nominations (without any revisions) will be automatically approved for up to three years before requiring another merit review. By resubmitting a carry-over nomination, the nominating official is affirming that in his or her professional judgment the original case made for shortage status, and the original description of needs, remain current and accurate.

8. *Definitions:* For the purpose of implementing the solicitation for veterinary shortage situations, the definitions provided in 7 CFR part 3431 are applicable. Given the evolving nature of food supply veterinary medicine, the Secretary has determined that equines used in agricultural production, any vertebrates or invertebrates that are consumed by, or produce food consumed by, humans are to be included in the list of food animals.

B. Nomination Form

The VMLRP Shortage Nomination Form must be used to nominate veterinarian shortage situations. Once designated as a shortage situation, VMLRP applicants will use the information to select shortage situations they are willing and qualified to fill, and to guide the preparation of their applications. NIFA will use the information to assess contractual compliance of awardees. The form is available in the VMLRP Shortage Situations section at <https://nifa.usda.gov/vmlrp-nomination-and-designation-veterinary-shortage-situations>. See Part II A. 5. for submission information. Resources to complete each field can be found at <https://nifa.usda.gov/resource/vmlrp-veterinary-shortage-situation-nomination-guide> and <https://nifa.usda.gov/resource/vmlrp-shortage-nomination-form>.

C. NIFA Review of Shortage Situation Nominations

1. *Review Panel Composition and Process:* NIFA will convene a panel of food supply veterinary medicine experts from Federal and/or State agencies, industry, private mixed or large animal practice or an institution receiving Animal Health and Disease Research Program funds under section 1433 of NARETPA or an 1862 Land-Grant institution, to review the nominations and make recommendations to the

National Program Leader. NIFA will review the panel's recommendations and designate the VMLRP shortage situations. The list of approved shortage situations will be made available on the VMLRP website at www.nifa.usda.gov/vmlrp.

2. *Review Criteria:* Criteria used by the shortage situation nomination review panel and NIFA for certifying a veterinary shortage situation will be consistent with the information requested in the shortage situations nomination form. NIFA understands the process for defining the risk landscape associated veterinary service shortages within a State may require consideration of many qualitative and quantitative factors. In addition, each shortage situation will be characterized by a different array of subjective and objective supportive information that must be developed into a cogent case identifying, characterizing, and justifying a given geographic or disciplinary area as deficient in certain types of veterinary capacity or service. To accommodate the uniqueness of each shortage situation, the nomination form provides opportunities to present a case using both supportive metrics and narrative explanations to define and explain the proposed need.

While NIFA anticipates some arguments made in support of a given shortage situation will be qualitative, respondents are encouraged to present verifiable quantitative and qualitative evidentiary information wherever possible. Absence of sufficient data to support a shortage such as animal and veterinarian census data for the proposed shortage area(s), or sufficient information regarding the characteristics of the shortage so that applicants may prepare successful applications and panelists are able to fully evaluate the fit of the applicant to the shortage area, may lead the panel to recommend revision of the shortage nomination to address these issues. If the revisions are not addressed, the shortage nominations will not be approved.

Done in Washington, DC, this day of May 24, 2022.

Dionne Toombs,

Acting Director, National Institute of Food and Agriculture, U.S. Department of Agriculture.

BILLING CODE P

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Vehicle Inventory and Use Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication

of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on April 15, 2022, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau, Commerce.

Title: Vehicle Inventory and Use Survey.

OMB Control Number: 0607-0892.

Form Number(s): TC-9501, TC-9502.

Type of Request: Regular submission, Request for a Revision of a Currently Approved Collection.

Number of Respondents: 150,000.

Average Hours per Response: 65 minutes.

Burden Hours: 162,500.

Needs and Uses: The 2021 VIUS collects data to measure the physical and operational characteristics of trucks from a sample of approximately 150,000 trucks. These trucks are selected from more than 190 million private and commercial trucks registered with motor vehicle departments in the 50 states and the District of Columbia. The Census Bureau is collecting the data for the sampled trucks from the registered truck owners.

The VIUS is the only comprehensive source of information on the physical and operational characteristics of the Nation's truck population. The VIUS provides unique, essential information for government, business, and academia. The U.S. Department of Transportation, State Departments of Transportation, and transportation consultants compliment VIUS microdata as extremely useful and flexible to meet constantly changing requests that cannot be met with predetermined tabular publications. The planned microdata file will enable them to cross-tabulate data to meet their needs.

This revision is being submitted to correct the legal citations related to the collection authority for the Vehicle Inventory and Use Survey (VIUS). We initially received clearance to add the corrected citation using the emergency clearance process, which was approved separately. The emergency clearance was necessary because we needed to implement the change immediately during data collection for the survey. This revision is to now add Title 13 U.S.C., Section 221 to the collection authority under the original clearance and to allow a full review at OMB.
