

burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Title: Soil and Non-Soil Fumigant Risk Mitigation.

ICR numbers: EPA ICR No. 2451.03, and OMB Control No. 2070-0197.

ICR status: This ICR is currently scheduled to expire on January 31, 2023. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers, after appearing in the **Federal Register** when approved, are displayed either by publication in the **Federal Register** or by other appropriate means, such as with the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations in title 40 of the Code of Federal Regulations (CFR) is consolidated in 40 CFR part 9.

Abstract: Pursuant to section 4(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA determined that several soil and non-soil fumigants are eligible for reregistration only if specific risk mitigation measures are adopted and adequately implemented. This ICR documents the PRA activities for users, registrants, and participating states to implement fumigant risk mitigation measures for the chemicals identified in this document.

The PRA burden activities discussed in this ICR include: registrant activities to develop and implement training for fumigators in charge of fumigations, develop and disseminate safety information for handlers, develop and implement community outreach and education programs, and develop and implement first responder training; and labeling activities for fumigant products; including user posting requirements concerning fumigant applications around the use site, providing notice of soil fumigant applications to applicable states, preparing a Fumigant Management Plan (FMP) and Post-Application Summary (PAS) as needed, participating in an EPA-approved fumigant training program, and disseminating fumigant safe handling information to handlers.

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is

estimated to average from a range of 0.8 to 13.9 hours per response.

Respondents/affected entities: Entities potentially affected by this ICR are soil and non-soil fumigant users, specifically certified applicators and agriculture pesticide handlers North American Industrial Classification System (NAICS) code 111000—Agriculture, Forestry, Fishing and Hunting); soil and non-soil fumigant registrants (NAICS 325300—Pesticide, Fertilizer, and Other Agricultural Chemical Manufacturing); and state and tribal lead agencies (NAICS 999200—State Government).

Respondent's obligation to respond: Mandatory under FIFRA section 3(c)(2)(B).

Estimated total number of potential respondents: 118,436 (total).

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 5.

Estimated total annual estimated burden hours: 1,159,232 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Estimated total annual costs: \$31,979,828 (per year), includes \$1,060,214 annualized capital or operation and maintenance costs.

III. Are there changes in the estimates from the last approval?

There is an increase of 8,336 hours in the total estimated respondent burden compared with that currently approved by OMB. This increase is due to the update in the estimated number of applicators certified and handlers for soil and non-soil fumigations. There is also a decrease in burden costs for both types of fumigation due to updating the wages to the current 2021 data provided by the U.S. Bureau of Labor Statistics.

In addition, OMB has requested that EPA move towards using the 18-question format for ICR Supporting Statements used by other federal agencies and departments and is based on the submission instructions established by OMB in 1995, replacing the alternate format developed by EPA and OMB prior to 1995. The Agency does not expect this change in format to result in substantive changes to the information collection activities or related estimated burden and costs.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the

submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

(Authority: 44 U.S.C. 3501 *et seq.*)

Dated: June 16, 2022.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.
