

regulatory text at paragraph § 1926.62 (d)(2)(iv).

On February 18, 2020, OSHA corrected typographical errors, including extraneous or omitted materials and inaccurate graphics, in 27 OSHA standards and regulations. In one of these corrections under Subpart D—Occupational Health and Environmental Controls, Lead, OSHA amended paragraphs 1926.62(d)(2)(iii) and (iv) by replacing the outdated references to “Table 1 of this section” with the correct references to “paragraph (f) of this section,” as Table 1 no longer existed (see 85 FR at 8728).

These corrections resulted in the inadvertent removal of the list of tasks at the end of paragraph (d)(2)(iv). OSHA is correcting 29 CFR 1926.62 to restore this list.

II. Exemption From Notice and Comment Procedures

OSHA has determined this correction is not subject to the procedures for public notice and comment specified in Section 4 of the Administrative Procedure Act (5 U.S.C. 553), and Section 6(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655(b)). This rulemaking only reinstates the inadvertent removal of four lines of regulatory text. The text that was removed was originally promulgated as part of an interim final rule mandated by Title X of the Housing and Community Development Act of 1992 (Pub. L. 102–550) and was included in § 1926.62(d)(2)(iv) for more than 25 years until its inadvertent deletion. No stakeholder is likely to object to this correction. Therefore, the agency finds good cause, in accordance with 29 CFR 1911.5 and 5 U.S.C. 553(b)(3)(B), that public notice and comment are unnecessary under 5 U.S.C. 553(b) and 29 U.S.C. 655(b).

III. State Plans

When federal OSHA promulgates a new standard or more stringent amendment to an existing standard, the states and U.S. Territories with their own OSHA-approved occupational safety and health plans (State Plans) must promulgate a state standard adopting such new federal standard or more stringent amendment to an existing federal standard, or an at least as effective equivalent thereof, within six months of promulgation of the new federal standard or amendment. The state may demonstrate that a standard change is not necessary if the state standard is already the same or at least as effective as the federal standard change.

Of the 28 states and territories with OSHA-approved State Plans, 22 cover public and private-sector employees: Alaska, Arizona, California, Hawaii, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Nevada, New Mexico, North Carolina, Oregon, Puerto Rico, South Carolina, Tennessee, Utah, Vermont, Virginia, Washington, and Wyoming. The remaining six states and territories cover only state and local government employees: Connecticut, Illinois, Maine, New Jersey, New York, and the Virgin Islands.

OSHA concludes this correcting amendment restores inadvertently removed regulatory text which contains protections afforded employees under this standard for more than 25 years. Therefore, OSHA has determined that, within six months of the rule’s promulgation date, State Plans must review their state standards and adopt this correction, unless the State Plans demonstrate that such amendment is not necessary, either because their existing standards continue to include the language that was inadvertently removed from the federal standard or because they have adopted different standards that are at least as effective as the reinstated federal provisions.
