SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for revision and extension of collection 0648-0496 entitled "Reporting of Sea Turtle Entanglement in Fishing Gear or Marine Debris". We request to revise the name of the collection to "National Sea Turtle Stranding and Salvage Network Stranding and Gear Interaction Data Collection" and to add new forms to the collection to be inclusive of all forms used by Sea Turtle Stranding and Salvage Network (STSSN).

NOAA's National Marine Fisheries Service (NMFS) and the U.S. Fish and Wildlife Service (USFWS) share federal jurisdiction for the conservation and recovery of sea turtles. In accordance with the 1977 Memorandum of Understanding between NMFS and USFWS, which was reaffirmed in 2015, NMFS serves as the lead for and coordinator of the STSSN. The STSSN currently responds to and documents, sick, injured, and dead (*i.e.*, 'stranded') sea turtles that are found in coastal areas under U.S. jurisdiction along the Atlantic Ocean and Gulf of Mexico. NMFS Office of Protected Resources coordinates the STSSN. The Sea Turtle Disentanglement Network (STDN) is a part of the STSSN. The STSSN is a cooperative effort of authorized federal, state, and private partners working to inform causes of morbidity and mortality in sea turtles by responding to and documenting stranded sea turtles. Information is collected in a manner sufficient to inform sea turtle conservation management and recovery. The STSSN accomplishes this through (1) collection of data in accordance with STSSN protocols; (2) improved understanding of causes of death and threats to sea turtles; (3) monitoring of stranding trends; (4) provision of initial aid to live stranded sea turtles; (5) provision of sea turtle samples/parts for conservation-relevant research; and (6) availability of timely data for conservation management purposes. To facilitate this data collection, the STSSN uses several standardized data collection forms. To ensure all data collected by the STSSN are in the same collection, we propose adding the following forms to 0648-0496: STSSN Stranding Report form, Gross Necropsy forms (2 page and 4 page versions), Cold

Stun individual and batch forms, Fishing Gear Identification forms, and Incidental Capture Intake form (currently approved in collection 0648-0774, expiring December 31, 2024).

All species of sea turtle found in U.S. waters are listed as endangered or threatened under the Endangered Species Act (ESA). NMFS and the USFWS share federal jurisdiction for the conservation and recovery of sea turtles. Section 4(f) of the ESA (16 U.S.C. 1531-1544) provides for the creation of Recovery Plans for endangered and threatened species and provides NMFS and USFWS with authority "to procure the services of appropriate public and private agencies and institutions and other qualified persons" in order to implement those plans. To advance the conservation and recovery of listed sea turtles, each sea turtle recovery plan developed jointly by NMFS and USFWS identifies and highlights the need to maintain an active stranding network. Both NMFS and USFWS have promulgated regulations that provide an exception to the prohibitions on take and allow for coordinated response to stranded sea turtles in water and on land, based on their specific jurisdictional responsibility.
