

international competitiveness and increased spaceflight safety?

(6) Currently, OSC does not have specific space traffic control authority over space objects. What, if any, future space traffic control regimes would be desirable? Should provision of OSC SSA data or basic spaceflight safety services be accompanied with binding directions or procedures to spacecraft operators? What impact, if any, would such directions or procedures have on liability for U.S. spacecraft operators or value-added service providers?

D. General Feedback

OSC welcomes feedback about any other related topics. For example, are there any matters not discussed above that OSC should or must consider before it provides SSA data and basic spaceflight safety services?

III. How To Submit Your Response

To facilitate review of your responses, please reference the subject of the RFI in your response. You may respond to some or all of the topic areas covered in the RFI, and you can suggest other factors or relevant questions. You may also include links to online material or interactive presentations. If including data sets, please make the data available in a downloadable, machine-readable format with accompanying metadata.
