

under this provision of the FD&C Act for statutorily regulated products.

Section 2 of Table 1 estimates that 77 respondents (43 cigarette filler and RYO tobacco and 34 smokeless manufacturers, importers, or their agents) will test quantities of HPHCs in an average of 44 products annually. This section addresses the time required for manufacturers and importers (or their agents) who must test HPHC quantities in products. The burden estimates include the burden to test the tobacco products, draft testing reports, and submit the report to FDA. The total expected burden for this section is 481 hours.

Section 3 of Table 1 addresses the time required for manufacturers and importers to test quantities for HPHCs in cigarette smoke. The burden estimates include: the burden to test the number of replicate measurements; test date range; manufacture date range; extraction method; separation method; detection method; and mean quantity and standard deviation of HPHCs and includes the burden to test the tobacco products, draft testing reports, and submit the report to FDA. The annual burden reflects our estimate of the time it takes to test the tobacco products (*i.e.*, carry out laboratory work). The burden estimate assumes that manufacturers and importers report HPHC quantities in cigarette mainstream smoke according to both the ISO and Health Canada smoking regimens. The total expected burden is 17,996 hours for this section.

The total estimated burden for this information collection is expected to be 19,193 hours and 424 annual responses.

Our estimated burden for the information collection reflects an overall increase of 354 annual responses and a corresponding increase of 16,677 hours. We attribute this adjustment to updated methodology in which the current estimates are derived from historical statutory tobacco product applications submitted and authorized by FDA in the past 4 years as: (1) manufacturers and importers (or their agents) of authorized products are required to submit HPHC reports at least 90 days prior to delivery for introduction into interstate commerce for all new products; and (2) initial reporting under section 904(a)(3) of the FD&C Act for statutory products was completed in 2012.
