**SUPPLEMENTARY INFORMATION:**

**Background**

On October 19, 2021, NMFS notified the Council that EBS snow crab status has been changed to overfished. The EBS snow crab assessment shows that mature male biomass (MMB) is 50,600 metric tons (mt), which is less than the minimum stock size threshold (MSST) of 76,700 mt, therefore the stock is overfished.

Total snow crab mature male biomass (MMB) has varied considerably since 1990 from a high of 626.7 kilotons (kt) to a low of 50.6 kt in 2021. Observed MMB in the survey increased to historical highs in the 1990s but then declined significantly later that decade. The stock was declared overfished in 1999 in response to the total mature biomass dropping below the 1999 MSST. Observed MMB slowly increased after 1999, and the stock was declared rebuilt in 2011 when estimated MMB at mating was above B35 percent. However, after 2011, the stock declined and the observed MMB at the time of the survey dropped to an all-time low in 2021. In recent years, MMB was increasing as a large recruitment moved through the size classes, but that recruitment event has since disappeared and the observed mature male biomass at the of the 2021 survey was 50.6 kt, a new all-time low. This is the first time a mass mortality event appears to have occurred for snow crab since the survey began and the biomass of important size categories of crab is at historic lows. Because EBS snow crab is overfished, the Council is working to develop a recommended rebuilding plan, consistent with section 304(e) of the Magnuson-Stevens Fishery Conservation and Management Act.

In June 2022, the Council adopted draft alternatives for analysis to establish a rebuilding plan for EBS snow crab, which will be presented to the Council likely in December 2022, and available for public comment. As a separate but related component in response to the change in snow crab status, the Council also initiated a request for information on ways to reduce fishing-related mortality of EBS snow crab. This RFI is therefore seeking public comment on ways to reduce fishing-related mortality of EBS snow crab, and comment on this RFI is invited through September 23, 2022. Information on the Council's tentative agendas for the next three meetings can be found at <https://www.npfmc.org/3meeting/> (the Three Meeting Outlook).

**Request for Information**

This notice requests public comment on the motion put forward by the Council on June 10, 2022, which can be viewed at <https://tinyurl.com/C3EBSCouncilmotion6-10-22>.

The scope of public comments is not limited, but questions that may be considered include:

1. Voluntary measures for implementation in 2023 and beyond to avoid EBS snow crab and reduce crab mortality in the non-directed fisheries;
2. Measures in the directed crab fishery to reduce discard mortality of EBS snow crab;
3. Description of research that would inform development of more flexible and effective spatial management measures; gear modifications to reduce impacts on the EBS snow crab stock, or to evaluate unobserved mortality in the trawl sector.

The Council will review comments submitted in response to this request for information during the October and December 2022 Council meetings. The October Council meeting is scheduled to begin on October 3, 2022. The schedule and agenda for both meetings will be available a month prior to the meeting. All responses to this request for information will be posted and publicly available on the Council agenda for the October and December 2022 meetings.

**Public Comment**

Responses to this request are voluntary. Respondents need not reply to all questions. All responses are a part of the public record and will be posted on a public website. Therefore, confidential business information, copyrighted information, or personally identifiable information (e.g., name, address, etc.) should not be submitted in response to this request. NOAA and the Council will not pay for any information

or administrative costs that you may incur in responding to this RFI, or for the use of any information contained in the response. The documents and information submitted in response to this RFI become the property of the U.S. Government and will not be returned.

**Agency Information Collection Activities; Submission for OMB Review; Comment Request; Safety Standard for Automatic Residential Garage Door Operators**

**AGENCY:** Consumer Product Safety Commission.

**ACTION:** Notice.

**SUMMARY:** As required by the Paperwork Reduction Act of 1995, the Consumer Product Safety Commission (CPSC, or Commission) announces that the Commission has submitted to the Office of Management and Budget (OMB) a request for extension of approval for information collection requirements regarding notifications under the safety standard for automatic residential garage door operators. OMB previously approved the collection of information under OMB Control No. 3041-0125. On May 5, 2022, CPSC published a notice in the **Federal Register** to announce the agency's intention to seek extension of approval of the collection of information. The Commission received no comments. Therefore, by publication of this notice, the Commission announces that CPSC has submitted to the OMB a request for extension of approval of this collection of information.

**DATES:** Submit written or electronic comments on the collection of information by August 15, 2022.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to: [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. In addition, written comments that are sent to OMB also should be submitted electronically at: <http://www.regulations.gov>, under Docket No. CPSC-2012-0054.
