[Project No. 15277-000]

Rye Bailey Hydroelectric, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On June 6, 2022, Rye Bailey Hydroelectric, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of hydropower at the existing U.S. Army Corps of Engineers' (Corps) R.D. Bailey Dam located on the Guyandotte River in Mingo and Wyoming Counties, West Virginia. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed R.D. Bailey Hydroelectric Project would consist of the following: (1) a new 40-foot-wide, 60-foot-long powerhouse to be located downstream of the Corps dam along the northern bank; (2) a new concrete bifurcation chamber at the end of an

existing conduit to divide flows between the stilling basin and the powerhouse; (3) a new 15-foot-diameter penstock approximately 50 feet long; (4) two turbine-generator units with a total generating capacity of 8 megawatts; (5) a new 100-foot-wide by 400-foot-long tailrace; (6) a new substation with a step-up transformer; (7) a new 2.5-mile-long, 46-kilovolt transmission line; and (8) appurtenant facilities. The proposed project would have an estimated annual generation of 30,000 megawatt-hours.
