Federal Energy Regulatory Commission

[Docket No. CP19-488-000]

Columbia Gulf Transmission, LLC; Notice of Request for Extension of Time

Take notice that on July 22, 2022, Columbia Gulf Transmission, LLC (Columbia Gulf) requested that the Federal Energy Regulatory Commission (Commission) grant an extension of time (2022 Extension of Time Request), until December 31, 2022, to construct and place into service the facilities that were authorized in the original certificate authorization issued on September 17, 2020 (Certificate Order).¹ The Certificate Order authorized the Louisiana XPress Project (Project) and required Columbia Gulf to complete construction of the Project facilities and made them available for service by September 17, 2022.

Columbia Gulf states that unexpected settlement issues arose at the Chicot and Shelburn Compressor Stations (CS) during the final phases of construction, resulting in a delay of the previously anticipated Project in-service date of February 1, 2022. Columbia Gulf explains that, it has completed remediation activities at the Chicot CS and subsequently placed the Chicot CS into service and commenced flowing partial incremental Project volumes on July 1, 2022. Columbia Gulf states that, Columbia Gulf is working at the Shelburn CS to complete remediation activities and expect to complete construction and have a full in-service date between September 20, 2022 and November 1, 2022.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on Columbia Gulf's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for Natural Gas

Act facilities when such requests are contested before order issuance. For those extension requests that are contested,² the Commission will aim to issue an order acting on the request within 45 days.³ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁴ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act.⁵ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁶ The OEP Director, or his or her designee, will act on all of those extension requests that are uncontested.

SUPPLEMENTARY INFORMATION:

Title: FERC-539 (Gas Pipeline Certificates: Import & Export Related Applications).

OMB Control No.: 1902-0062.

Type of Request: Three-year extension of the FERC-539 with no changes to the current reporting requirements.

Abstract: The purpose of FERC-539 is to implement information collections pursuant to Section 3 of the Natural Gas Act (NGA).¹ This statute provides, in part, that ". . . no person shall export any natural gas from the United States to a foreign country or import any natural gas from a foreign country without first having secured an order from the Commission authorizing it to do so."² This statute applies not only to natural gas imported and/or exported via pipeline but also to any import and/or export of liquefied natural gas via a liquefied natural gas terminal. The 1992 amendments to Section 3 of the NGA concern importation or exportation from/to a nation which has a free trade agreement with the United States, and requires that such importation or exportation: (1) Shall be deemed to be a "first sale", *i.e.*, not a sale for a resale, and (2) Shall be deemed to be consistent with the public interest, and applications for such importation or exportation shall be granted without modification or delay.

*Estimate of Annual Burden:*³ The Commission estimates the annual public reporting burden for the information collection as:

² Contested proceedings are those where an intervenor disputes any material issue of the filing. 18 CFR 385.2201(c)(1) (2019).

³ *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

⁴ *Id.* at P 40.

⁵ Similarly, the Commission will not re-litigate the issuance of an NGA section 3 authorization,

including whether a proposed project is not inconsistent with the public interest and whether the Commission's environmental analysis for the permit order complied with NEPA.

⁶ *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

¹ 15 U.S.C. 717-717w.

² 15 U.S.C. 717b.

³ Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. See 5 CFR 1320 for additional information on the definition of information collection burden.
