

the interview with a Census telephone interview agent.

The National Sample Survey of Registered Nurses is proposing one experiment for the 2022 cycle utilizing unconditional monetary incentives. For the 2022 cycle, NSSRN is proposing \$5 with an initial web invitation letter for 90% of the sample receiving. The intention of the monetary incentive is to test the efficacy of reducing nonresponse bias by encouraging response, that is, whether offering \$5 increases response, thus reducing non-response bias, and reducing costs associated with follow-up mailings. The unconditional monetary incentive will be randomly assigned to 90% of the sample prior to data collection. The remaining 10% of the sample will not receive an unconditional monetary incentive and will be the control group.

Affected Public: Nurses.

Frequency: The 2022 collection is the second administration of the NSSRN. Data collection is every four years.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Tillamook South Jetty Repairs in Tillamook Bay, Oregon

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of incidental harassment authorizations.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued two incidental harassment authorizations (IHAs) to the U.S. Army Corps of Engineers (USACE)—Portland District (Corps) to incidentally harass, by Level A and Level B harassment only, marine mammals during construction activities associated with a Tillamook South Jetty Repairs in Tillamook Bay, Oregon.

DATES: The Year 1 IHA is effective from November 1, 2022 through October 31, 2023. The Year 2 IHA is effective from November 1, 2024 through October 31, 2024.

FOR FURTHER INFORMATION CONTACT: Reny Tyson Moore, Office of Protected Resources, NMFS, (301) 427–8401. Electronic copies of the application and supporting documents, as well as a list of the references cited in this document, may be obtained online at: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-construction-activities>. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the “take” of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are proposed or, if the taking is limited to harassment, a notice of a proposed IHA is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other “means of effecting the least practicable adverse impact” on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to in shorthand as “mitigation”); and requirements pertaining to the mitigation, monitoring and reporting of the takings are set forth.

The definitions of all applicable MMPA statutory terms cited above are included in the relevant sections below.

Summary of Request

On February 11, 2022, NMFS received a request from the Corps for two one-year IHAs to take marine mammals incidental to repairs of the Tillamook South Jetty in Tillamook Bay, Oregon. The application was deemed adequate and complete on May 23, 2022. The Corps’ request is for take of five species of marine mammals by Level B harassment and, for a subset of these species (*i.e.*, harbor seals (*Phoca vitulina richardii*), northern elephant seals (*Mirounga angustirostris*), and harbor porpoises (*Phocoena phocoena*)), take by Level A harassment. Neither the Corps nor NMFS expect serious injury or mortality to result from this activity and, therefore, IHAs are appropriate.

Description of Activity

The Corps constructed, and continues to maintain, two jetties at the entrance of Tillamook Bay, Oregon to provide reliable navigation into and out of the bay. A Major Maintenance Report (MMR) was completed in 2003 to evaluate wave damage to the jetties and provide design for necessary repairs. Some repairs to the North Jetty were completed in 2010, and further repairs to the North Jetty root and trunk began in January 2022. The Tillamook South Jetty Repairs Project (*i.e.*, the “Corps’ activities”) will complete critical repairs to the South Jetty, as described in the MMR, with a focus on rebuilding the South Jetty head. Work will consist of repairs to the existing structures within the original jetty footprints (*i.e.*, trunk repairs and the construction of a 100-foot cap to repair the South Jetty Head), with options to facilitate land- and water-based stone transport, storage,
