

Administrator of General Services. *Federal facility* means all or any part of any federally owned or leased building, physical structure or associated support infrastructure (e.g., parking facilities and utilities) that is under the jurisdiction, custody, or control of GSA. *Federal grounds* mean all or any part of any area outside a Federal facility that is under the jurisdiction, custody, or control of GSA.

§ 102–81.10 What basic physical security policy governs Federal agencies?

The Interagency Security Committee (ISC) is responsible for developing and evaluating physical security standards for nonmilitary Federal facilities. In accordance with E.O. 12977, the ISC sets policies and recommendations that govern physical security at Federal facilities and on Federal grounds occupied by Federal employees for nonmilitary activities. This includes the ISC Risk Management Process Standard (the RMP Standard) that Federal agencies use in the protection of the real property they occupy, including the protection of persons on the property. The goal of the RMP Standard is a level of protection commensurate with the level of risk. ISC policies do not supersede other laws, regulations, and Executive orders that are intended to protect unique assets.

§ 102–81.15 What are the governing authorities for this part?

The governing authorities are as follows:

- (a) 40 U.S.C. 121(c) and 581.
- (b) E.O. 12977.
- (c) E.O. 13286, sec. 23.
- (d) 6 U.S.C. 232.
- (e) Homeland Security Presidential Directive 12.
- (f) REAL ID Act of 2005 (Pub. L. 109–13).

§ 102–81.20 Who must comply with this part?

Each agency occupying a Federal facility or Federal grounds under the jurisdiction, custody, or control of GSA, including those facilities and grounds that have been delegated by the Administrator of General Services, for nonmilitary activities must comply with this part, except where the Director of National Intelligence determines that compliance would jeopardize intelligence sources and methods or the Secretary of Energy determines that compliance would conflict with the authorities of the Secretary of Energy over Restricted Data and Special Nuclear Material under, among others, sections 141, 145, 146, 147, and 161 of the Atomic Energy Act of 1954, as amended, the Department of Energy

Organization Act, or any other statute. In situations where a Federal facility is occupied by multiple Federal agencies for both military and nonmilitary activities, and each such occupancy is substantial, those occupants will coordinate on the physical security of the facility.

Subpart B—Physical Security

§ 102–81.25 Who is responsible for implementing, maintaining, and upgrading physical security standards in each Federal facility and on Federal grounds under the jurisdiction, custody, or control of GSA?

Each agency occupying a Federal facility or Federal grounds under the jurisdiction, custody, or control of GSA, including those facilities and grounds that have been delegated by the Administrator of General Services, for nonmilitary activities is responsible for implementing, maintaining, and upgrading the physical security standards, except where the Director of National Intelligence determines that compliance would jeopardize intelligence sources and methods or the Secretary of Energy determines that compliance would conflict with the authorities of the Secretary of Energy over Restricted Data and Special Nuclear Material under, among others, sections 141, 145, 146, 147, and 161 of the Atomic Energy Act of 1954, as amended, the Department of Energy Organization Act, or any other statute. An occupant agency, if it is the only Federal occupant agency in the building, or the Facility Security Committee (FSC), as applicable, uses the facility security assessment reports they receive from the U.S. Department of Homeland Security—Federal Protective Service to inform deliberations regarding recommended countermeasures and other security-related actions. GSA will facilitate the implementation of the countermeasures or other actions after occupant agency or FSC approval, as applicable, and commitment of each occupant agency to pay its *pro rata* share of the cost.

§ 102–81.30 Are there any special considerations for existing Federal facilities and Federal grounds under the jurisdiction, custody, or control of GSA?

No, the RMP Standard applies to existing nonmilitary Federal facilities as part of the periodic risk assessment process. The security organization responsible for the Federal facility or Federal grounds will conduct a periodic risk assessment and recommend countermeasures and design features to be implemented at the Federal facility or on the Federal grounds. The FSC will determine whether the recommended

countermeasures will be implemented or if risk will be accepted. The design and implementation of approved countermeasures at existing facilities must comply with applicable laws, regulations, and Executive orders. For approved countermeasures that cannot be implemented immediately, a plan to phase in countermeasures and achieve compliance must be instituted and documented in accordance with the RMP Standard. In some cases, the implementation of countermeasures must be delayed until renovations or modernization programs occur.

§ 102–81.31 Are there any special considerations for leased facilities or new construction?

Yes. GSA will coordinate with the occupant agency and the security organization responsible for the Federal facility or Federal grounds when determining the applicable physical security clauses to use in the procurement package.

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received final OMB approval on July 20, 2022, for the information collection requirement contained in the modification to 47 CFR 64.1200(n)(1).

Under 5 CFR part 1320.5(b), an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number for the information collection requirement in 47 CFR 64.1200(n)(1) is 3060–1303.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–1303.

OMB Approval Date: July 20, 2022.

OMB Expiration Date: January 31, 2023.

Title: Advanced Methods to Target and Eliminate Unlawful Robocalls, Sixth Report and Order, CG Docket No. 17–59, Call Authentication Trust Anchor, Fifth Report and Order, WC Docket No. 17–97, FCC 22–37.

Form Number: N/A.

Respondents: Business or other for-profit entities, not-for-profit institutions, and state, local or tribal governments.

Number of Respondents and

Responses: 6,493 respondents; 311,664 responses.

Estimated Time per Response: .25 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in sections 4(i), 4(j), 201, 202, 217, 227, 227b, 251(e), 303(r), and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 201, 202, 217, 227, 227b, 251(e), 303(r), and 403.

Total Annual Burden: 77,916 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission adopted a new information collection associated with the Advanced Methods to Target and Eliminate Unlawful Robocalls Sixth Report and Order and Call Authentication Trust Anchor Fifth Report and Order (“Gateway Provider Report and Order”). Unwanted and illegal robocalls have long been the Federal Communication Commission’s (“Commission”) top source of consumer complaints and one of the Commission’s top consumer protection priorities. Foreign-originated robocalls represent a significant portion of illegal robocalls, and gateway providers serve as a critical choke-point for reducing the number of illegal robocalls received by American consumers. In the Gateway Provider Report and Order, the Commission took steps to prevent these foreign-originated illegal robocalls from reaching

consumers and to help track these calls back to the source. Along with further extension of the Commission’s caller ID authentication requirements and Robocall Mitigation Database filing requirements, the Commission adopted several robocall mitigation requirements, including a requirement for gateway providers to respond to traceback within 24 hours, mandatory blocking requirements, a “know your upstream provider” requirement, and a general mitigation requirement.

This document also modifies § 64.1200(p) of the Commission’s rules, which advised that compliance was not required until OMB approval was obtained.
