

public interest to grant an exemption from certain process requirements in 49 CFR part 1572 related to STAs for HMEs. TSA based this determination on the need for commercial drivers with an HME to continue to work without interruption while supply chain pressures ease and TSA is able to address increasing HME enrollment volumes, which have impacted STA processing times. Extending the HME expiration date through this exemption would not compromise the current level of transportation security because TSA conducts recurrent security threat checks on HME holders and takes action to revoke an HME if derogatory information becomes available, regardless of expiration date. TSA uses data previously submitted by these individuals to conduct recurrent security threat vetting to ensure that they do not pose a security threat.

This exemption permits states to extend the expiration date for an HME for up to 180 days for eligible individuals with an HME that expires between July 1, 2022 and December 27, 2022, even if the individual did not initiate or complete submission of required information for an STA at least 60 days before expiration of the HME.¹² Consistent with the requirements in 49 CFR 1572.13(b), if the state grants an extension to an individual, the State must, if practicable, notify the individual that the state is extending the expiration date of the HME, the date that the extension will end, and the individual's responsibility to initiate the STA renewal process at least 60 days before the new expiration date. If it is not practicable for a State to give individualized notice to drivers, the state may publish general notice, for example, on the appropriate website.

The purpose of this exemption is to allow states to provide commercial drivers with up to six months of relief from action necessary to meet TSA's STA renewal requirements during a period of increased demand for commercial drivers. It allows for the 60 days TSA needs to complete processing of the individual's application for STA renewal once it is submitted. The exemption permits, but does not require, states to extend the expiration date for HMEs.

By permitting states to extend the expiration date of HMEs within the scope of this exemption, TSA better

positions states to ensure that CDL holders with HMEs will be able to continue to provide their critical services amid supply chain pressures and increased demand for STAs, licenses, and endorsements. TSA has determined that there is little risk to transportation security associated with the exemption. The exemption is subject to the following conditions:

(1) The extension applies only to individuals who currently hold an HME;

(2) The extension is for a limited time, dependent on the duration and scope of supply chain pressures and increased HME enrollment volumes for drivers, and subject to possible modification by TSA before the closure of the effective period; and

(3) TSA will continue to conduct security threat checks of these during the period of the extension and retain its full authority to immediately revoke or suspend an individual's STA (Determination of No Security Threat) and to order a state to revoke an individual's HME.¹³

Exemption

State Exemption. During the effective period of this exemption, states are exempt from the requirement in 49 CFR 1572.13(a) prohibiting renewal of an eligible individual's HME for a CDL, unless the state receives a new STA (Determination of No Security Threat) from TSA. For the duration of this exemption, a state may extend the expiration date of an eligible individual's HME for a period of no more than 180 days without a new STA. The state must notify each eligible individual that he or she is subject to an STA for renewal of the HME and that he or she must initiate the STA at least 60 days before the extended expiration date of the HME. If it is not practicable for a state to give individualized notice to drivers, the state may publish general notice, for example, on the appropriate website. TSA will continue to recurrently vet these individuals against terrorism and other governmental watch lists and databases and reserves authority under 49 CFR 1572.5(b) and 1572.13 to direct a state to revoke an individual's HME immediately and at any time.

For purposes of this exemption, an *eligible individual* is defined as an individual who held a valid, unexpired HME with an STA (Determination of No Security Threat) on or after July 1, 2022, which HME has expired or would otherwise expire between that date and

the close of the effective period of this exemption.

Limits of Exemption. This exemption does not apply to new HMEs nor does it affect any other requirements applicable to obtaining a commercial driver's license under 49 CFR parts 383 and 384.

David P. Pekoske,

Acting Administrator.
