**Abstract:** Pursuant to the Animal Welfare Act of 1966 (AWA; 7 U.S.C. 2131 *et seq.*), as amended, and the U.S. Government Principles for Utilization of Vertebrate Animals Used in Testing,

Research, and Training (1995), any entity or institution that uses vertebrate animals for research, testing, or training purposes must have an oversight committee to evaluate all aspects of that institution's animal care and use. The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668ee), as amended, the Service's Code of Scientific Integrity and Scholarly Conduct (212 FW 7; 2011), and the Service's Inventory and Monitoring Program Policy (701 FW 2; 2014) ensure that Service staff adhere to accepted practices for the treatment of wildlife used in science, conservation efforts, and population management. To ensure compliance, the Service's Animal Welfare Program is standing up an Animal Use Committee (also known as an Institutional Animal Care and Use Committee, or IACUC), which will provide guidance to staff to promote animal welfare, human and animal safety, and scientific integrity in the form of protocol review.

The Service's Animal Use Committee (AUC), organizationally aligned under the National Wildlife Refuge System, will provide the experience and expertise necessary to assess and approve all activities involving vertebrate animals on national wildlife refuges (NWRs). The Service's AUC serves as the primary oversight mechanism for animal welfare by reviewing and approving proposed activities related to the care and use of both free-ranging and captive wildlife. In order to comply with the Animal Welfare Act, at minimum, the Service's AUC membership will consist of a chair, an administrator, an attending veterinarian, Service biologist(s) representing various specialties, and a non-Service-affiliated member representing society's expectations for animal welfare. Ad hoc species-specific expert advisors will be requested to help with protocol review as needed. All projects conducted on NWRs by Service staff and non-FWS entities that involve wildlife use must be reviewed and approved by the Service's AUC prior to their commencement. Other branches of the Service are welcome to submit protocols for review, but it will not be required. The majority of people requesting AUC review are anticipated to be Service staff, but other Federal employees or researchers from universities or private institutions conducting projects on NWRs will also require AUC review.

The Service proposes to utilize a new platform, Key Solutions eProtocol IACUC Software Module for Animal Subjects (eProtocol IACUC), to implement the AUC. The eProtocol
