

Respondents/affected entities: Stationary combustion turbines.
Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart KKKK).
Estimated number of respondents: 871 (total).
Frequency of response: Semiannual.
Total estimated burden: 90,300 hours (per year). Burden is defined at 5 CFR 1320.3(b).
Total estimated cost: \$10,800,000 (per year), which includes no annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The increase in burden from the most-recently approved ICR is due to an increase in the number of new or modified sources. This ICR updates the number of affected sources subject to the regulation based on an assumption

that the industry continues to grow at a constant rate since the previous renewal. There are no capital or operation and maintenance costs associated with this regulation.
