**SUPPLEMENTARY INFORMATION:****I. Background**

FDA is announcing the availability of a revised draft guidance for industry entitled “Expanded Access to Investigational Drugs for Treatment Use: Questions and Answers.” Under the expanded access regulation provided in 21 CFR part 312, subpart I, FDA allows

use of investigational drugs for treatment of patients with serious or immediately life-threatening diseases or conditions who lack therapeutic alternatives. FDA issued a guidance in 2016 (updated in 2017) in a question-and-answer format to respond to the most frequently asked questions on various provisions of the regulation regarding expanded access.

The Cures Act added section 561A to the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360bbb-0) to include new requirements regarding expanded access. Under section 561A of the FD&C Act, a manufacturer or distributor of one or more investigational drugs for the diagnosis, monitoring, or treatment of one or more serious diseases or conditions is required to make its policy for evaluating and responding to expanded access requests (expanded access policy) readily available to the public, such as by posting the policy on a publicly available website. In addition, FDARA (Pub. L. 115-52) amended the FD&C Act to require that the expanded access policy for an investigational drug be posted by the earlier of (1) the first initiation of a phase 2 or phase 3 study with respect to such investigational drug or (2) within 15 days after the drug receives a fast track, breakthrough, or regenerative advanced therapy designation.

This revised draft guidance includes responses to stakeholder questions received since publication of the updated final guidance in 2017 and includes the Agency's recommendations related to new requirements of the Cures Act and FDARA that are related to expanded access. This guidance revises the guidance for industry of the same title issued in June 2016 and updated in October 2017. Significant changes to the 2017 version of the guidance include additional recommendations related to institutional review board review, informed consent, and new requirements established by the Cures Act and FDARA.

This revised draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The revised draft guidance, when finalized, will represent the current thinking of FDA on "Expanded Access to Investigational Drugs for Treatment Use: Questions and Answers." It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the of the applicable statutes and regulations.
