Abstract: This information collection request seeks to reinstate a previously discontinued collection. The Comprehensive Survey of the American Public (CSAP) is the only national information collection by the NPS that describes visitors and non-visitors to units of the National Park System. Information on non-visitors, including their demographic characteristics and reasons for their non-visitation, is especially important in designing programs to reach underserved populations more effectively. The CSAP is administered every 5 years, a period determined to be long enough to identify important trends in key measures and to survey visitor and non-visitor perceptions, attitudes, behaviors, and knowledge related to the programs, services, and recreational opportunities offered by the NPS. Based on the strong mandate for socioeconomic monitoring expressed in the NPS strategic goals for science and the Department of the Interior priorities for 2018–2022, this information collection will provide the high-quality data required to enhance the development of programs and resources within the NPS. In addition to telephone surveys, the 2022 CSAP will use online data collecting methods as an option to mitigate expenses and address the diminishing return rate of telephone surveys in the previous iterations.
