Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Household Pulse Survey

On September 12, 2022, the Department of Commerce received clearance from the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1995 to conduct Phase 3.6 of the Household Pulse Survey (OMB No. 0607–1013, Exp. 10/31/23). The Household Pulse Survey was designed to meet a need for timely information associated with household experiences during the Covid–19 pandemic. The Department is committed to ensuring that the data collected by the Household Pulse Survey continue to meet information needs as they may evolve over the course of the pandemic. This notice serves to inform of the Department's intent to request clearance from OMB to make some revisions to the Household Pulse Survey questionnaire. To ensure that the data collected by the Household Pulse Survey continue to meet information needs as they evolve over the course of the pandemic, the Census Bureau submits this Request for Revision to an Existing Collection for a revised Phase 3.7 questionnaire.

Phase 3.7 includes new questions on changes in travel and spending due to increasing prices, school meals, displacement due to natural disaster, receipt/loss of Medicaid coverage, and a question that asks certain respondents if they are not working due to coronavirus, natural disaster, or another reason. There are also modifications to existing vaccine booster, children's vaccine booster, infant formula, reasons not working, and inflation items. Several questions will be removed for Phase 3.7, including replaced children's vaccine booster items, and questions about educational catch-up activities and the receipt of antiviral/antibody treatments.

It is the Department's intention to commence data collection using the revised instrument on or about December 7, 2022. The Department invites the general public and other Federal agencies to comment on

proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden.
