[Notice–ID–2022–02; Docket No. 2022–0002;
Sequence No. 29]

**Privacy Act of 1974; Notice of a
Modified System of Records**

AGENCY: Office of the Chief Privacy Officer, General Services Administration (GSA).

ACTION: Notice of a modified system of records.

SUMMARY: GSA proposes to modify a system of records subject to the Privacy Act of 1974, as amended. *Login.gov* is a secure sign-in service with the capability to authenticate and identity proof users before the user is granted access to participating government websites or applications. GSA is modifying the categories of records in the system, the policies and practices for retrieval and routine uses of records, and removing outdated references to National Institute of Standards and Technology (NIST) technical standards. This modification is intended to revise and replace all notices previously describing this system of records.

DATES: Submit comments on or before: December 21, 2022.

ADDRESSES: Submit comments identified by “Notice–ID–2022–02,

Notice of Modified System of Records” via. Submit comments via <https://www.regulations.gov>, the Federal eRulemaking portal, by searching for Notice–ID–2022–02, Notice of Modified System of Records. FOR FURTHER INFORMATION CONTACT: Richard Speidel, Chief Privacy Officer, GSA, by email at gsa.privacyact@gsa.gov or by phone at 202–969–5830.

SUPPLEMENTARY INFORMATION: GSA proposes to alter language in this system of records to remove an outdated NIST technical standard, and instead use plain language to describe the system's authentication and identity proofing process.

In 2019, the Office of Management and Budget (OMB) published Memorandum 2019–17 (M–19–17), which withdrew Memorandum 2004–04 (M–04–04) and specified the most recent version of NIST SP 800–63 as authoritative for defining levels associated with the rigor of various digital identity related functions. OMB directed agencies to transition from the prior use of Levels of Assurance (LOAs) from M–04–04 in favor of Authentication Assurance Levels (AALs), Identity Assurance Levels (IALs), and Federation Assurance Levels (FALs).

To prevent future potential misalignment between Federal guidance and this system of record notice (SORN), this revision removes references to NIST standards and instead uses plain language descriptions of *Login.gov*'s authentication and identity proofing process. This revision also adds categories of records and two new routine uses related to research studies and fraud prevention operations, and details the records management practices for those new records.

Specifically:

- references to Level of Assurance (LOA) are removed because that is an outdated NIST technical standard and *Login.gov* instead uses plain language descriptions of its authentication and identity proofing process;
- use of records to increase coverage and access to authentication and identity proofing services to the public, including studies evaluating impacts to equitable access by identity verification.
- use of records to support fraud prevention operations to preserve
