

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Perchloroethylene Dry Cleaning Facilities (EPA ICR Number 1415.13, OMB Control Number 2060–0234) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through January 31, 2023. Public comments were previously requested, via the **Federal Register**, on April 8, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 23, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2022–0073, to EPA online using <https://www.regulations.gov/> (our preferred method), or by email to docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Perchloroethylene Dry Cleaning Facilities (40 CFR part 63, subpart M) were proposed on December 9, 1991; promulgated on September 22, 1993; and most-recently amended on November 19, 2020. These regulations apply to both existing and new dry-cleaning facilities that use perchloroethylene (PCE). New facilities include those that either commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart M.

Form Numbers: None.

Respondents/affected entities: Dry cleaning facilities that use perchloroethylene (PCE).

Respondent's obligation to respond: Mandatory (40 CFR 63, subpart M).

Estimated number of respondents: 28,020 (total).

Frequency of response: Annual.

Total estimated burden: 1,590,343 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$197,000,000 (per year), which includes \$948,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Director, Regulatory Support Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Halogenated Solvent Cleaners/Halogenated Hazardous Air Pollutants were proposed on November 29, 1993; promulgated on December 2, 1994; and most recently-amended on May 3, 2007. These regulations apply to each individual batch vapor, in-line vapor, in-line cold, and batch cold solvent cleaning machine that uses any solvent containing methylene chloride; perchloroethylene; 1,1,1-trichloroethane; trichloroethylene; carbon tetrachloride; chloroform; or any combination of these halogenated HAP solvents, in a total concentration greater than 5 percent by weight, as a cleaning and/or drying agent. New facilities include those that commenced either construction or reconstruction on or after December 2, 1994. This information is being collected to assure compliance with 40 CFR part 63, subpart T.

In general, all NESHAP standards require initial notification reports, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Halogenated solvent cleaning machines.

Respondent’s obligation to respond: Mandatory (40 CFR part 63, subpart T).

Estimated number of respondents: 931 (total).

Frequency of response: Quarterly, semiannual.

Total estimated burden: 31,300 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$4,420,000 (per year), which includes \$660,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is either very low, negative, or non-existent, so there is no significant change in the overall burden.

Proposed Consent Decree, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Clean Air Act, as amended (CAA or the Act), EPA is providing notice of a proposed consent decree in *Comité Progreso de Lamont, et al. v. United States Environmental Protection Agency, et al.*, No. 3:21-cv-08733-WHA (N.D. Cal.). On November 10, 2021, Plaintiffs Comité Progreso de Lamont, Committee for a Better Arvin, Committee for a Better Shafter, Central California Environmental Justice Network, Association of Irrigated Residents, Medical Advocates for Healthy Air, National Parks Conservation Association, and Sierra Club filed a complaint in the United States District Court for the Northern District of California. Plaintiffs alleged that the Environmental Protection Agency (EPA or the Agency) failed to perform certain non-discretionary duties in accordance with the Act. These duties pertain to

promulgation of a Federal Implementation Plan (FIP) for the San Joaquin Valley area of California to address certain remaining nonattainment plan requirements for the 1997, 2006, and 2012 PM_{2.5} national ambient air quality standards (NAAQS). The proposed consent decree would establish deadlines for EPA to sign notices of proposed and final actions.

DATES: Written comments on the proposed consent decree must be received by December 23, 2022.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OGC-2022-0894, online at <https://www.regulations.gov> (EPA’s preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to <https://www.regulations.gov>, including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the “Additional Information about Commenting on the Proposed Consent Decree” heading under the **SUPPLEMENTARY INFORMATION** section of this document.
