Abstract: Producers of pesticides and pesticide devices must maintain certain records with respect to their operations and make such records available for inspection and copying as specified in section 8 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and in regulations at 40 CFR part 169.

This information collection is mandatory under 40 CFR part 169. It is used by the Agency to determine compliance with FIFRA. The information is used by EPA Regional pesticide enforcement and compliance staffs, the Office of Enforcement and Compliance Assurance (OECA), and the Office of Pesticide Programs (OPP) within the Office of Chemical Safety and Pollution Prevention (OCSPP), as well as the U.S. Department of Agriculture (USDA), the Food and Drug Administration (FDA), and other Federal agencies, States under

Cooperative Enforcement Agreements, and the public. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Form Numbers: None.

Respondents/affected entities:

Producers of pesticides and pesticide devices for sale or distribution in or exported to the United States.

Respondent's obligation to respond: Mandatory (40 CFR part 169).

Estimated number of respondents: 19,027 (total).

Frequency of response: Annual.

Total estimated burden: 15,078 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$909,655 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 42,054 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease of 42,054 hours is a result of our reassessment of the assumptions used to estimate the burden of this ICR. Adjustments resulted from corrections of clerical or computational errors in the previous ICR renewal supporting statement. Further adjustments to the burden estimates resulted from (1) adjustments in the salary computation for industry to reflect current wage rates, (2) adjustments for inflation, and (3) adjustment to the number of respondents.

Director, Regulatory Support Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Pulp and Paper Production (40 CFR part 63, subpart S) apply to both existing facilities and new facilities that produce pulp, paper, or paperboard by employing kraft, soda, sulfite, semi-chemical, or mechanical pulping processes using wood, or any process using secondary or non-wood fiber and that emits 10 tons per year or more of any hazardous air pollutant (HAP) or 25 tons per year or more of any combination of HAPs. Affected sources are all the HAP emission points in the pulping and bleaching system for mechanical pulping processes using wood and any process using secondary or non-wood fiber. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of pulp and paper production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart S).

Estimated number of respondents: 104 (total).

Frequency of response: Semiannually.

Total estimated burden: 30,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$4,470,000 (per year), which includes \$766,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The decrease in burden from the most recently approved ICR is due to various adjustments. An adjustment decrease is due to a decrease in respondents and more accurate estimates of hours per occurrence that were used in the calculations supporting the prior renewal. The estimated number of respondents reflects Agency review of data collected from ECHO, the Agency's internal database of information collection responses from the pulp and paper industry, and current permits for

identified facilities. The hours to read and understand rule requirements were decreased for this renewal, since the prior renewal supported rule amendments. There is also a decrease in Capital/Startup vs. Operation and Maintenance (O&M) costs due to a decrease in the number of respondents.

Director, Regulatory Support Division.
