

benefit especially from the increased resilience and recovery of private utilities. HUD also recognizes that privately-owned, for-profit utilities have a means of obtaining private investment or otherwise recapturing costs from ratepayers. Therefore, HUD's alternative requirement below includes basic safeguards that HUD has determined are necessary to ensure that costs comply with the certification to give maximum feasible priority to activities that benefit LMI persons and that costs are necessary and reasonable and do not duplicate other financial assistance. The following alternative requirement also makes clear that assistance to utilities is subject to all other requirements that apply to the use of funds and must be for an eligible activity under section 105(a):

Iowa may assist private for-profit, non-profit, or publicly owned utilities as part of disaster-related activities that are eligible under Section 105(a) of the HCDA, or otherwise made eligible through a waiver or alternative requirement, provided that the grantee complies with the following:

1. The funded activity must comply with applicable CDBG-DR requirements, including the requirements that the assisted activity will meet a national objective, the activity will address an unmet recovery need, and if the assistance is provided to a for-profit entity for an economic development project under Section 105(a)(17), the grantee must first comply with the underwriting requirements found at Appendix A of 24 CFR part 570.

2. The grantee must carry out the grant consistent with the grantee's certification that

“With respect to activities expected to be assisted with CDBG-DR funds, the action plan has been developed so as to give the maximum feasible priority to activities that will benefit low- and moderate-income families.”

To fortify compliance with the existing certification, if the grantee carries out activities that assist privately-owned, for-profit utilities, the grantee must prioritize assistance to for-profit utilities that will benefit areas where at least 51 percent of the residents are LMI persons and demonstrate how assisting the private, for-profit utility will benefit those areas.

3. The grantee must determine that the costs of the activity to assist a utility are necessary and reasonable and that they do not duplicate other financial assistance. To fortify these requirements and achieve a targeted use of funds and to safeguard against the potential over-subsidization when assistance is used to

carry out activities that benefit private, for-profit utilities, the grantee must document that the level of assistance provided to a private, for-profit utility addresses only the actual identified needs of the utility. Additionally, the grantee must establish policies and procedures to ensure that the CDBG-DR funds that assist private, for-profit utilities reflect the actual identified financing needs of the assisted businesses by establishing a mix of financing terms (loan, forgivable loan, and/or grant) for each assisted private, for-profit utility, based on the business's financial capacity in order to ensure that assistance is based on actual identified need.
