

are appointed to provide advice on the basis of their best judgment without representing any particular points of view and in a manner that is free from conflict of interest.

The members and chair shall possess extensive professional experience in the fields of national intelligence, national defense, or academia.

As necessary, subordinate subcommittees may be established with the approval of the DNI or designee to perform specific functions within the Board's purview.

Members shall be invited to serve for consecutive terms of one year, for a total not to exceed six years.

Meetings shall be held a minimum of two times per year at the call of the Designated Federal Official or designee who shall approve the agenda and shall be present at all meetings.

III. Compensation

NIU BoV members who are not Regular Government Employees (RGE) will not be paid salaries, wages, or compensation attributable to their services. If necessary and if requested, members may be reimbursed for travel and daily expenses incurred in connection with their service in accordance with the Federal Travel Regulations. Participating RGEs will continue to receive their government salary and may receive government per diem and travel allowances for any applicable NIU BOV-related work.

Dated: December 7, 2022.

Robert A. Newton,

Deputy Chief Operating Officer.

BILLING CODE 3910-A79-P-P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request.

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The National Science Foundation (NSF) is announcing plans to establish this collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, we are providing opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting Office of Management and Budget (OMB) clearance of this collection for no longer than 3 years.

DATES: Written comments on this notice must be received by February 13, 2023 to be assured consideration. Comments

received after that date will be considered to the extent practicable. Send comments to address below.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Suite E7400, Alexandria, Virginia 22314; telephone (703) 292-7556; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including Federal holidays).

SUPPLEMENTARY INFORMATION:

Title of Collection: National Science Foundation (NSF) Directorate for Technology, Innovation and Partnerships (TIP) Reviewer Request Form.

OMB Control No.: 3145-New.

Expiration Date of Approval: Not applicable.

Abstract: NSF has advanced the full spectrum of fundamental research and education in all fields of science, technology, engineering and mathematics, or STEM, for more than 70 years—from foundational, curiosity-driven research that has led to new knowledge about our world, to use-inspired, solution-oriented research that has directly impacted people's everyday lives. At every stage, investments across this spectrum have been deeply intertwined.

NSF's Directorate for Technology, Innovation, and Partnerships (TIP) doubles down on the agency's commitment to support use-inspired research and the translation of research results to the market and society. In doing so, the new directorate strengthens the intense interplay between foundational and use-inspired work, enhancing the full cycle of discovery and innovation. This is best illustrated through the programs within the TIP Directorate portfolio—America's Seed Fund, Convergence Accelerator, Innovation Corps (I-Corps), Partnerships for Innovation, Pathways to Enable Open-Source Ecosystems, and Regional Innovation Engines—all reflect and represent the various phases of the technology transition/translation spectrum, while accentuating the core theme of use-inspired and solution-oriented research.

Due to the specialized nature of these programs, it is necessary for the TIP Directorate to refine its reviewer recruitment efforts and reach out to individuals that have the adequate and appropriate combinations of expertise and experience to serve as proposal

reviewers for these programs. To recruit cognizant reviewers that have the set of unique skills and credentials—ones that meet and align well with the needs of these programs, the NSF TIP Directorate requests the Office of Management and Budget (OMB) approval of a customizable, directorate-wide *Reviewer Request Form* to collect information that is germane and bespoke to each program within the TIP Directorate.

There are two parts to the Form. The first part is similar to the agency-wide Reviewer Request Form (NSF 428A), in that information pertaining to the individual's name, contact information, demographics, education level, and professional experience will be asked. The second part will vary based on the program, as some programs in TIP are more topically-driven, and/or theme-focused than others. The information collected on the second part encompasses, but is not limited to, the following areas: type of employing institutions, areas of expertise, provision of the individual's LinkedIn or professional web page, and potential conflict of interests. Such data collection will enable the Program Directors to better assess whether the combination of experience, expertise, and skills of the interested individuals are adequate and well-suited to help the programs to evaluate proposals through the merit review criteria as set forth by the agency and the National Science Board. (For more information on NSF merit review principles and criteria, please consult the NSF Proposal & Award Policies & Procedures Guides (PAPPG), Chapter III.A.)

Following standard OMB requirements, NSF will require OMB approval in advance and provide OMB with a copy of the form containing these questions and/or data fields. Data collected will be used strictly for reviewer recruiting purposes. The data collection burden to the individuals will be limited to no more than 10 minutes of the respondents' time in each instance.

Respondents: The respondents generally have the education and/or experience level commensurate to a university assistant professor.

Estimated Number of Annual Respondents: 3,500.

Burden on the Public: The overall annualized cost to the respondents is estimated to be \$25,718. The following table shows the annualized estimate of costs to the respondents who generally have the education and/or experience level commensurate to university assistant professors. This estimated hourly rate is based on a report from the American Association of University

Professors, “Annual Report on the Economic Status of the Profession, 2020–21,” *Academe*, March–April 2021, Survey Report Table 1. According to

this report, the average salary of an assistant professor across all types of doctoral-granting institutions was \$91,408. When divided by the number

of standard annual work hours (2,080), this calculates to approximately \$44 per hour.

Respondent type	Number of respondents	Burden hours per respondent	Average hourly rate	Estimated annual cost
Pls	3500	0.167	\$44	\$25,718
Total				25,718

Dated: December 8, 2022.

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION
Agency Information Collection
Activities: Comment Request; 2023
National Survey of College Graduates

AGENCY: National Center for Science and Engineering Statistics, National Science Foundation.
ACTION: Submission for OMB review; comment request.

SUMMARY: The National Center for Science and Engineering Statistics (NCSES) within the National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register** and two comments were received. NCSES is forwarding the proposed information collection to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. The full submission may be found at: <http://www.reginfo.gov/public/do/PRAMain>.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314, or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf

(TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including Federal holidays). Comments regarding this information collection are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703–292–7556.

Comments: Comments regarding (a) whether the proposed collection of information is necessary for the proper performance of the functions of the NSF, including whether the information shall have practical utility; (b) the accuracy of the NSF’s estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, use, and clarity of the information on respondents; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to the points of contact in the **FOR FURTHER INFORMATION CONTACT** section.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:
Comments: As required by 5 CFR 1320.8(d), comments on the information collection activities as part of this study were solicited through the publication of a 60-day notice in the **Federal Register** on 4 May 2022, at 87 FR 26375. We received two comments. The nature of each comment and our responses are summarized below.

Comment: On 4 May 2022, Dr. Andrew Reamer of George Washington

University sent an email to NSF on behalf of the American Economic Association and the Industry Studies Association. He requested the draft information collection request (ICR) materials for the 2023 NSCG.

Response: NSF responded to Dr. Reamer on 13 May 2022, explaining that the 2023 NSCG ICR materials were in the process of being prepared and that the NSCG would be largely unchanged from its 2021 design, except that all the COVID-related items would be removed from the questionnaire such that the content would be returned to what it was in 2019.

Comment: On 24 June 2022, Dr. Jacqueline Robinson-Hamm sent an email to NSF on behalf of Dr. Patricia Morris, President of the Federation of American Societies for Experimental Biology (FASEB). FASEB recommended that the National Center for Science and Engineering Statistics (NCSES) expand its efforts to collect sexual orientation and gender identity (SOGI) data via its workforce surveys.

Response: NSF responded to Drs. Morris and Robinson-Hamm on 4 August 2022, informing them that NCSES continues to take a measured approach to adding SOGI questions to its surveys, to appropriately balance data quality, respondent burden, confidentiality, and data user needs, and directing them to an FAQ on the NCSES website (here).

Title of Collection: 2023 National Survey of College Graduates.

OMB Control Number: 3145–0141.

Summary of Collection: The National Survey of College Graduates (NSCG) has been conducted biennially since the 1970s. The 2023 NSCG sample will be selected from the 2021 American Community Survey (ACS) and the 2021 NSCG, providing coverage of the college graduate population residing in the United States. The purpose of this repeated cross-sectional survey is to collect data that will be used to provide national estimates on the science and engineering workforce and changes in their employment, education, and demographic characteristics.
