**SUPPLEMENTARY INFORMATION:**

**I. General Information**

*A. Does this action apply to me?*

You may be potentially affected by this action if you are a pesticide manufacturer, North American Industrial Classification System (NAICS) (Code 32532) or involved with Hawaiian wildlife conservation areas that have known populations of *Culex quinquefasciatus*. This listing is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Other types of entities not listed could also be affected.

*B. What should I consider as I prepare my comments for EPA?*

1. *Submitting CBI.* Do not submit this information to EPA through [www.regulations.gov](https://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that

is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/commenting-epa-dockets>.

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide(s) discussed in this document, compared to the general population.

**II. What action is the Agency taking?**

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the EPA Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the EPA Administrator determines that emergency conditions exist which require the exemption. The Hawaii Department of Agriculture has requested the EPA Administrator to issue a specific exemption for the use of DQB males for conservation purposes to control mosquitoes (*Culex quinquefasciatus*), which are a known vector to avian malaria and threaten Hawaii's endemic forest bird population. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the applicant asserts that avian malaria was introduced into the Hawaiian Islands in the 19th century and spread by a non-native mosquito. Hawaii is experiencing increased mosquito populations that have significantly reduced Hawaiian bird populations. According to the applicant, without mosquito control, the survival and recovery of Hawaii's few remaining forest birds, including threatened and endangered species, are at imminent risk.

The applicant proposes to make 156 maximum applications of DQB male mosquitoes per release site per year based on an anticipated maximum of 3 releases per week. The total number of application days is a maximum of 156 during the year. The total amount of DQB Males to be applied per year to treat conservation lands throughout Hawaii is up to 3,000,000 male mosquitoes per week or 156,000,000 males per year. The maximum amount of *Wolbachia pipientis*, DQB strain, to be applied per year is up to ~1.83g/week or 95g/year.

This notice does not constitute a decision by EPA on the application itself. The regulations governing FIFRA section 18 require publication of a notice of receipt of an application for a specific exemption proposing a new use of a microbial pesticide (*i.e.*, an active ingredient) which has not been registered by EPA. The notice provides an opportunity for public comment on the application.

The Agency will review and consider all comments received during the comment period in determining whether to issue the specific exemption requested by the Hawaii Department of Agriculture.
