

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Final Endorsement of Credit Instrument.

OMB Approval Number: 2502–0016.

Type of Request: Reinstatement, with change, of previously approved collection for which approval has expired.

Form Number: HUD–92023.

Description of the need for the information and proposed use: This information collected is being discontinued. The form HUD–92023, is being transferred to OMB 2502–0598.

Respondents: Business or other for-profit, Not-for-profit institutions, contractors, mortgagors/borrowers, and mortgagees/lenders.

Estimated Number of Respondents: 1,472.

Frequency of Response: 1.

Average Hours per Response: 1.

Total Estimated Burden: 1,472.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Jeffrey D. Little,

General Deputy Assistant Secretary, Office of Housing.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX23.WB12.C25A1.00; OMB Control Number 1028–0116]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Alaska Beak Deformity Observations

AGENCY: Geological Survey, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA), the U.S. Geological Survey (USGS) is proposing to renew an information collection with revisions.

DATES: Interested persons are invited to submit comments on or before January 17, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Written comments may also be submitted by mail to the U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive, MS 159, Reston, VA 20192; or by email to gs-info_collections@usgs.gov. Please reference OMB Control Number 1028–0116 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this Information Collection Request (ICR), contact Colleen Handel by email at cmhandel@usgs.gov, or by telephone at 907–786–7181. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the PRA and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information

collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on October 11, 2022 (87 FR 61355). One comment was received but it did not address the Information Collection. No action was taken.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response. Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: As part of the USGS Ecosystems Mission Area mission to assess the status and trends of the Nation's biological resources, the Alaska Science Center Landbird program conducts research on avian populations within Alaska. Beginning in the late 1990s, an outbreak of beak deformities in Black-capped Chickadees emerged in southcentral Alaska. USGS scientists launched a study to understand the scope of this problem and its effect on wild birds. Since that time, researchers

have gathered important information about the deformities, but their cause still remains unknown. Members of the public provide observation reports of birds with deformities from around Alaska and other regions of North America. These reports are very important in that they allow researchers to determine the geographical distribution and species affected. Data collection over such a large and remote area would not be possible without the public's assistance.

Title of Collection: Alaska Beak Deformity Observations.

OMB Control Number: 1028–0116.

Form Number: None.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: individuals/households.

Total Estimated Number of Annual Respondents: 250.

Total Estimated Number of Annual Responses: 250.

Estimated Completion Time per Response: 5 minutes to read the instructions and 10 minutes to complete the response form.

Total Estimated Number of Annual Burden Hours: 63.

Respondent's Obligation: Voluntary.

Frequency of Collection: on occasion.

Total Estimated Annual Nonhour Burden Cost: none.

An agency may not conduct or sponsor, nor is a person required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA (44 U.S.C. 3501 *et seq.*).

Christian Zimmerman,

USGS Alaska Science Center Director.

Agency Information Collection Activities; Stakeholder Engagement for Natural Hazards Investigations in the Caribbean

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the U.S. Geological Survey (USGS) is proposing an information collection to publicly announce a

request for information regarding natural-hazards resources and experts in U.S. Caribbean territories and other Caribbean nations.

DATES: Interested persons are invited to submit comments on or before February 13, 2023.

ADDRESSES: Send your comments on this information collection request (ICR) by mail to the U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive MS 159, Reston, VA 20192; or by email to *gs-info_collections@usgs.gov*. Please reference OMB Control Number 1028–NEW in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Donya Frank-Gilchrist by email at *dfrank-gilchrist@usgs.gov*, or by telephone at 727–502–8000. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the PRA, 44 U.S.C. 3501 *et seq.* and 5 CFR 1320.8(d)(1), all information collections require approval. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: We seek to connect with natural-hazards experts in the Caribbean to discuss the feasibility for the USGS to conduct natural-hazards research in the region in collaboration with U.S. territories and international partners. Natural hazards impacting U.S. Caribbean territories are driven by regional-scale processes which are coupled with those of neighboring international countries. Multi-hazards such as coastal storms and related hazards including flooding, sea level rise, freshwater scarcity, and coral reef degradation, should be investigated at a regional scale to better understand the processes and develop accurate numerical models to reduce loss of life and property. We will discuss primary natural hazards of concern with local experts to learn about their mitigation efforts and discuss areas of overlapping interests in which we may be able to collaborate. A final report will document feasible engagement strategies, key takeaways, and lessons learned. A database will be compiled of hazards experts and resources in each country to facilitate future potential collaborations.

Title of Collection: Stakeholder Engagement for Natural Hazards Investigations in the Caribbean.

OMB Control Number: 1028–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: universities, natural resource and disaster relief managers, community leaders, natural hazards experts, disaster and risk professionals.

Total Estimated Number of Annual Respondents: 100.

Total Estimated Number of Annual Responses: 100.
